NEWS, ANALYSIS , INVESTING INSIGHT

Philippine gold producers rise as bullion prices held steady after an advance of more than 2% in the previous session.

JFC 160.00

- **Jollibee Foods Corporation's (JFC) South Korean brand Compose Coffee is officially launching in Taiwan in Q2 2026. This expansion follows JFC's $340 million acquisition of the brand in August 2024.**

SMPH 20.00

- **Expands Arena Business; SM Seaside Cebu Arena Opening Q2 2026 with 25,000 Capacity**
- SM Prime is doubling down on its arena business as its SM Mall of Asia Arena hosted over 200 events and drew 1.1 million attendees in 2025 — a 10% increase year-on-year — and is expanding its footprint with the SM Seaside Cebu Arena opening in the second quarter of 2026, a 25,000-capacity venue that will be the largest in the SM network.
- SMPH invested $2.1 million in a Daktronics LED upgrade at MOA Arena in 2025. The Cebu Arena, integrated with South Coast City and directly connected to SMX Convention Center Cebu, is positioned to attract international acts and regional MICE events to Visayas without routing through Manila. SM Prime's integrated development model — where arenas drive retail, hotel, and commercial traffic — makes the arena business a high-leverage addition to recurring revenues. SMPH posted ₱48.8 billion in net income for 2025, +7%.
- **Stance on SMPH:** ACCUMULATE — Arena expansion reinforces the integrated development premium. Cebu's growing role as an international gateway supports the Visayas market thesis. SMPH's diversified earnings base provides resilience against the macro downturn.

CPG 0.68

- CPG net income after tax (NIAT) Fy25 up 15% at P2.77B Yy supported by robust demand across its residential projects.
- Revenues up 12% to P16.40B in 2025, fueled by steady construction progress, sustained buyer interest, and growth in its project portfolio.

NEWS, ANALYSIS , INVESTING INSIGHT

ENERGY SECTOR

- P**rime Energy / Malampaya — Razon-led Operator Eyes New Gas Blocks; MP4 on Track for Q4 2026**
- **P**rime Energy Resources Development B.V., operator of the Malampaya gas field, confirmed it is studying additional exploration blocks beyond Malampaya even as its ₱893-million Malampaya Phase 4 (MP4) project remains on track to deliver first gas by Q4 2026; two new wells — MAE-1 (98 billion cubic feet estimated reserves) and Camago 3 (up to 60 billion cubic feet) — have been drilled and tested, confirming gas reserves that could extend Malampaya's producing life by six years.
- CEO Donnabel Kuizon-Cruz said pipeline connections to the platform are already underway, with the Bagong Pag-asa exploration well — located 30 kilometers north of Malampaya — next on the drilling program. Since inception, Malampaya has generated over $14 billion in government revenues and supplies up to 13% of Luzon's electricity. In the context of the national energy emergency, any incremental Malampaya production is materially significant in reducing dependence on LNG and coal.
- Stance: POSITIVE — Policy/Infrastructure Signal. MP4 first gas delivery in Q4 2026 could provide modest relief to Luzon's supply tightness. Key beneficiaries: First Gas power plants (MER-linked), SNAP, FGEN. Watch for further DOE block award news tied to Prime Energy's exploration pipeline.

ICT 735.00

- **Completes Sale of China Terminal Stake for ₱6.8 Billion; Refocuses on Control-Driven Concessions**
- ICTSI completed the sale of its 51% stake in Yantai International Container Terminal Ltd. (YICTL) in Shandong Province, China to Yantai Port Holdings for approximately RMB 773.21 million (₱6.8 billion), with the deal signed March 23 and finalized March 31; co-investor DP World also sold its 12.5% stake, giving Yantai Port Holdings full ownership.
- ICTSI stated the divestment is consistent with its long-term strategy of focusing on concession contracts where it retains control over long-term development and commercial activities, and will redirect the proceeds to existing projects and pipeline opportunities. ICTSI separately reported net income rising 23% to $1.05 billion in 2025 on 18% revenue growth to $3.23 billion and 11% volume growth to 14.5 million TEUs. The company has set a $740 million capex for 2026 focused on expansion and upgrades. The China exit removes a minority-stake, low-control asset and reallocates capital to higher-return, higher-control opportunities — consistent with ICTSI's emerging market concession growth model.
- Stance on ICTSI: ACCUMULATE — Portfolio rationalization plus record $1 billion+ earnings validates the strategy. Proceeds will fund higher-return concession expansion. ICTSI is among the most geopolitically resilient listed names in the PSE given its global revenue diversification.

NEWS, ANALYSIS , INVESTING INSIGHT

CLI 2.49

- **Clarifies 2026 Capex Could Hit ₱20 Billion on Consolidated Basis**
- CLI clarified that its 2026 consolidated capex could reach approximately ₱20 billion — significantly higher than the ₱12–14 billion parent-level figure disclosed earlier — as the full figure includes spending by subsidiaries and joint ventures; approximately ₱12.7 billion (63%) is earmarked for project development, with the remainder for land acquisition and other capex across CLI and related entities.
- This is a material clarification, effectively doubling the investment signal from the prior day's briefing. The higher consolidated figure reflects CLI's expanding JV structure — including the NTT UD Asia-backed Luzon venture — and reinforces confidence that CLI is actively funding its growth pipeline despite macro headwinds. Record residential reservations of ₱24.6 billion in 2025 (+46% year-on-year) provide the demand validation for continued high capex deployment.
- Stance on CLI: ACCUMULATE — ₱20 billion consolidated capex at 91% sell-out rate is a strong signal of disciplined demand-driven expansion. Luzon entry execution is now the key re-rating catalyst to watch.

ROCK 2.01

- Full-Year 2025 Net Income Jumps 28% to ₱4.73 Billion on Residential and Leasing Gains; ATC Consolidation Adds One-Time Boost
- Rockwell Land reported a 27.6% increase in attributable net income to ₱4.73 billion for 2025, with total consolidated revenues rising 3.9% to ₱20.87 billion, driven by a 5% gain in residential revenues from higher project completions and 6% growth in retail and leasing income from improved rental rates and occupancy; the result also included gains from the acquisition and consolidation of Alabang Commercial Corp. (ACC), which owns Alabang Town Center.
- A separate analysis notes approximately ₱680 million of the profit came from the one-time accounting gain on the ACC deal, which Rockwell acquired for ₱21.6 billion in 2025. EBITDA climbed to ₱8.8 billion, reflecting improved margins and operating efficiency. Rockwell's premium residential positioning in BGC and Makati continues to insulate it from mid-market condo oversupply dynamics. The ATC acquisition adds a recurring commercial income stream that substantially diversifies the earnings base beyond residential.
- Stance on ROCK: ACCUMULATE — Underlying residential and leasing earnings are strong; the ATC integration positions Rockwell as a more balanced residential-commercial developer. Strip out the one-time gain, and core earnings growth is still solid. Watch for ATC contribution ramp-up in 2026.

NEWS, ANALYSIS , INVESTING INSIGHT

JFC 160.00

- **Jollibee Foods Corporation’s (JFC) South Korean brand Compose Coffee is officially launching in Taiwan in Q2 2026. This expansion follows JFC’s $340 million acquisition of the brand in August 2024.**

SMPH 20.00

- **Expands Arena Business; SM Seaside Cebu Arena Opening Q2 2026 with 25,000 Capacity**
- SM Prime is doubling down on its arena business as its SM Mall of Asia Arena hosted over 200 events and drew 1.1 million attendees in 2025 — a 10% increase year-on-year — and is expanding its footprint with the SM Seaside Cebu Arena opening in the second quarter of 2026, a 25,000-capacity venue that will be the largest in the SM network.
- SMPH invested $2.1 million in a Daktronics LED upgrade at MOA Arena in 2025. - **Stance on SMPH:** ACCUMULATE — Arena expansion reinforces the integrated development premium. Cebu's growing role as an international gateway supports the Visayas market thesis. SMPH's diversified earnings base provides resilience against the macro downturn.

NEWS, ANALYSIS , INVESTING INSIGHT

CPG 0.68

- F**ull-Year 2025 Net Income Up 14% to ₱2.77 Billion; PHirst Drives 75% of Revenues**
- Century Properties Group reported a 14% rise in 2025 net income to ₱2.77 billion on 12% revenue growth to ₱16.40 billion, with its PHirst affordable housing segment contributing ₱12.3 billion or 75% of total revenues; EBITDA grew 21% to ₱5.28 billion on a 48% gross profit margin, while debt ratios improved with debt-to-EBITDA easing to 3.4x from 3.9x.
- CPG also progressed its corporate restructuring — absorbing Phirst Park Homes into the parent and merging Century Limitless with Century Communities — which it expects to improve resource allocation and regulatory efficiency. The Antonio family-led developer continues to execute a dual-brand strategy across affordable (PHirst) and premium segments, with new launches planned in Cavite (Cerulean Residences) and Mindanao. CPG's leveraged but improving balance sheet warrants continued monitoring, but the earnings trajectory is constructive.

MEG 2.08

- Breaks Ground on ₱12 Billion San Benito Private Estate Wellness Township in Lipa, Batangas
- Megaworld has begun land development for its ₱12-billion San Benito Private Estate in Lipa City, Batangas — a 25-hectare integrated wellness township developed in partnership with CG Hospitality, operator of The Farm at San Benito under Marriott's Autograph Collection; the township will feature private villas, residential lots, commercial spaces, and wellness amenities, with direct access to The Farm's holistic health facilities.
- About 50% of the estate will be devoted to green and open spaces. Megaworld is backing the project within its P65-billion 2026 capex program, one of three township developments it is pursuing in Batangas. The wellness township concept is a differentiator in a crowded mid-to-premium residential market, targeting the medical tourism and wellness residential segments — niches with growing international and domestic demand.
- **Stance on MEG:** MONITOR — Wellness township is a thematic long-term play but capex is high and earnings uplift from San Benito is years away. MEG's P65 billion capex commitment is ambitious in the current high-cost environment; watch FCF generation and debt management.

NEWS, ANALYSIS , INVESTING INSIGHT

ABSP 3.31

- **Board Majority Rejects Shutdown Proposal; Governance Battle with Lopez Family Continues**
- ABS-CBN confirmed that one of its directors proposed shutting down the company without addressing obligations to employees, retirees, and other stakeholders — a proposal the majority of the board rejected, with the majority group contributing hundreds of millions of pesos personally and through their family corporation to keep operations going.
- The unnamed director is widely understood to be Federico "Piki" Lopez, who was ousted from Lopez Inc.'s presidency in February over allegedly questionable energy asset transactions and subsequently obtained a court restraining order. The Gabby Lopez-aligned majority — chairman Martin Lopez, CEO Carlo Katigbak, Rafael Lopez, and three independent directors — defended continued financial support for the network's 4,000 employees and its public service obligations. ABS-CBN has been working to narrow losses since losing its franchise in 2020; the board's rejection of liquidation is a governance signal that the majority remain committed to a turnaround path.
- Stance on ABSP: AVOID — The Lopez family governance dispute creates material uncertainty over strategic direction. Franchise-less ABS-CBN remains in a financial recovery phase with no near-term earnings visibility for investors. Governance overhang outweighs turnaround optionality for now.

GMA7 5.97

- Full-Year 2025 Net Income Up 6.28% to ₱2.2 Billion; Election Ads Prop Up Soft Core Business
- GMA Network posted full-year 2025 net income of ₱2.2 billion — up ₱132 million or 6% — with total revenues rising to ₱18.12 billion and advertising revenues reaching ₱16.57 billion (+2%), though the improvement was largely driven by election-related advertising; without the political ad boost, core advertising would have declined 5%.
- Operating costs rose 5% to ₱15.54 billion. EBITDA grew 1% to ₱5.29 billion. GMA retains its dominance in Philippine free TV following ABS-CBN's 2020 franchise loss, though the underlying ad environment heading into 2026 faces headwinds from reduced consumer discretionary spending in the oil shock environment. Without a comparable midterm election cycle in 2026, ad revenue trends will normalize downward unless the macro environment improves.
- **Stance on GMA7:** MONITOR — 2025 earnings quality is soft (election-dependent); the 2026 operating environment is more challenging given the macro downturn, reduced consumer spending, and no election ad cycle. GMA's content leadership and ratings dominance provide a floor. Watch 2026 core ad revenue trajectory closely.

NEWS, ANALYSIS , INVESTING INSIGHT

GLO 1,645.00

- **BMI: Globe's Candle Cable Entry Supports Philippine Cloud and Data Center Growth**
- BMI Research stated that the Candle Cable System, alongside broader subsea cable investments, will underpin the Philippines' digital backbone, catering to rising international data traffic from AI, cloud, and 5G uptake despite potential cost increases from the Iran war's impact on cable project costs; BMI noted the Candle Cable directly links the Philippines with Taiwan, Japan, Malaysia, Indonesia, and Singapore, strengthening digital infrastructure resilience.
- The research house flagged that investors are expected to continue increasing subsea infrastructure investments despite geopolitical risks, prioritizing diversified, resilient routes. For Globe, the BMI endorsement validates both the commercial rationale and the strategic timing of the Candle investment, positioning it as a key gateway for the region's AI and cloud connectivity growth. Combined with the simultaneous tender offer for its $600M perpetual securities, Globe enters the week having executed two major capital structure moves.
- **Stance on GLO**: ACCUMULATE — Strategic upgrade of both the balance sheet (liability management) and the infrastructure stack (Candle Cable) in the same week is a double positive re-rating catalyst. Data center and cloud connectivity tailwinds are secular, not cyclical.

NEWS, ANALYSIS , INVESTING INSIGHT

CEB 31.55

- **Q1 Passenger Traffic Up 8.4% to 7.5 Million; Q2 Stance Cautious on Fuel**
- March passenger volume rose 11.5% y/y to 2.46M, aided by school breaks and stronger international demand.
- Seat load factor 82.1%, capacity up 10.6%, and Q1 traffic was 7.54M (up 8.4%); CEB will trim frequencies & focus on stronger routes amid volatile fuel prices.
- Cebu Pacific carried over 7.5 million passengers in Q1 2026, up 8.4% year-on-year, with domestic traffic growing 7.9% to 5.6 million and international growing 9.8% to 1.9 million; overall seat load factor averaged 83.7% on 10% more seat capacity, while March alone saw 11.5% growth.
- CEO Mike Szucs flagged a cautious Q2 approach, with optimized flight frequencies and route focus amid volatile fuel pricing. Cebu Pacific has secured jet fuel through June 2026 and notes that 72% of its 101-aircraft fleet are fuel-efficient A320neo variants, providing structural cost resilience. Shares rose 2.1% to ₱31.55 on Wednesday.
- **Stance on CEB:** MONITOR — Demand is strong and the NEO fleet provides a structural edge, but Q2 fuel cost passthrough and ticket price sensitivity in an inflation-stressed consumer environment are key earnings risks. The diesel rollback effective April 14 partially eases ground transport competition. Watch Q2 load factor and yield trends.
