NEWS, ANALYSIS , INVESTING INSIGHT

SM 696.50

- **SM Investments reported a 10% increase in net income to ₱90.5B for 2025, driven by a 7% rise in mall revenue and a 9% increase in hotel revenue. The group is expanding its portfolio with major mall developments and plans to double its hotel room count by 2029.**
- **Analysis:** Solid recurring income base and strong balance sheet support steady growth. Execution risk manageable.
- **Recommendation:** Accumulate (core long-term compounder; add on dips).

UBP 26.70

- **UnionBank of the Philippines FY25 net profit at P10.0B, Revenues P83.2B**
- **Analysis:** Still in post-Citi integration phase with margin and cost normalization ongoing. Recovery story depends on improving ROE, credit costs, and integration gains.
- **Recommendation:** Hold (selective accumulate if risk-tolerant).

GLO 1,678.00

- **Globe completed an oversubscribed ₱25-billion follow-on preferred share offer. Management reiterated capex below US$1B, focusing on capital optimization and extracting returns from prior network investments.**
- **Analysis: T**he raise strengthens funding flexibility (and can help refinance/redeem higher-cost instruments depending on use of proceeds), while the sub-$1B capex stance signals a shift from heavy build-out to monetization/efficiency. Key watch: revenue growth vs. depreciation/interest drag that pressured 2025 earnings.
- **Recommendation:** Hold / Accumulate on dips. Positive balance-sheet/capex discipline signal; upside depends on improving service revenue momentum and margin control.

TEL 1,374.00

- **PLDT Home is expanding its digital home services and pushing fiber prepaid as a key subscriber-growth lever. It expects the prepaid segment to deliver meaningful growth in 2026, citing positive unit economics.**
- **Analysis:** Fiber prepaid is strategically aligned with a price-sensitive market and can widen addressable base, but competitive intensity and churn management will matter. The bigger equity question is whether consumer momentum translates into sustained cash flow under capex discipline and rising digital attach (security/entertainment/services).
- **Recommendation:** Hold. Constructive operating direction; treat as incremental positive while waiting for clearer group-level earnings and capital-allocation catalysts.

NEWS, ANALYSIS , INVESTING INSIGHT

FILRT 3.03

- **Maxicare opened a nearly 1,100-sq.m. outpatient clinic at Filinvest Three (Alabang), cited as among the largest clinics in the Philippines; FILRT disclosed it as a new tenant.**
- **Analysis:** Positive for occupancy quality and tenant diversification (healthcare tends to be stickier), supporting recurring rental stability. The broader driver remains office demand/renewals and portfolio optimization.
- **Recommendation:** Hold. Incremental positive; not a step-change catalyst by itself.

ALHI 3.90

- A**rthaland launched Sondris, a 37-story Makati residential tower with 252 units across multiple configurations (1BR to garden units).**
- **Analysis:** Launch supports project pipeline and brand positioning in premium/green living, but execution will hinge on sell-through pace, pricing power, and funding/cost management given a choppy property cycle.
- **Recommendation:** Neutral / Hold. Good pipeline visibility; monitor reservation uptake and margin indicators.

MREIT 14.16

- **MREIT's 2025 distributable income rose 18% to ₱3.7B; revenues increased 24% to ₱5.6B, helped by occupancy and asset additions.**
- **Analysis:** Stronger distributable income supports dividend capacity and signals steadier office leasing contribution. Key risks remain office market supply/absorption and reversion spreads, but asset infusion model continues to underpin growth.

VLL 1.14

- **Villar Land said it will fully cooperate after DOJ subpoenas linked to an SEC complaint (filed Jan. 30) and potential criminal charges pursued by the regulator.**
- **Analysis: T**his is a governance/regulatory overhang that can weigh on sentiment, funding terms, and valuation until clarified. Market typically discounts heightened headline risk regardless of operational fundamentals.
- **Recommendation: Avoid / Hold only if high risk tolerance. Wait for clearer legal trajectory and disclosures.**

NEWS, ANALYSIS , INVESTING INSIGHT

PSE 203.00

- **PSE posted ₱1.22B net income in 2025 (+1.4% YoY). Operating revenues rose to ₱2.84B, boosted by consolidation of Philippine Dealing System Holdings (PDS) and trading/capital-raising/depository income.**
- **Analysis:** PDS consolidation improves revenue scale, but integration costs and market activity cycles will drive earnings volatility. Upside lever is sustained trading turnover and stronger listings/capital raising.
- **Recommendation: Hold. Stable franchise; better accumulated during market pessimism/low volume cycles.**
-

SMC 67.30

- **SM Investments said it is evaluating an exit from its stake in Atlas Consolidated Mining to prioritize investments aligned with its core and renewable energy focus.**
- **Analysis:** Portfolio reallocation could reduce commodity exposure and sharpen strategic focus. For Atlas, an SMIC exit adds ownership/overhang uncertainty (timing, pricing, and potential buyer identity matter).
- **Recommendation:**
  - **SMIC: Hold / Accumulate on dips (strategic refocus is generally supportive).**
  - **AT: Speculative Hold. Wait for clarity on transaction terms and post-exit shareholder structure.**

-

PLUS 16.70

-
  - **DigiPlus chairman Eusebio Tanco bought 63.12M shares (~1.4% of outstanding) at ₱16.40/share, worth about ₱1.04B.**
  - **Analysis: Large insider buying is typically read as confidence signaling, especially after regulatory/legal noise in the sector. Still, the stock remains sensitive to policy/regulatory direction and earnings visibility.**
  - **Recommendation: Speculative Buy / Trade (tight risk controls). Momentum-friendly, but keep position sizing conservative due to headline volatility.**
-
