Global, Regional Markets

Confidence in the US economy is lifting equities, while global uncertainty is boosting commodities. Wall Street rallies, Oil surges with WTI near $92.49 & Brent above $101, gold steady on geopolitical demand. Bitcoin jumps 3.0%to $78.9K, with most strength across risk assets.

Strong Q1 earnings boosted sentiment, with nearly 80% of reporting S&P 500 companies beating estimates. President Trump's indefinite ceasefire extension—building on a 2-week truce mediated by Pakistan—eased Middle East tensions, US naval blockade of the Strait of Hormuz stays.

Asian stocks dropped, snapping a two-day rise, as failed US-Iran talks and a shaky ceasefire fueled investor anxiety. The MSCI Asia Pacific Index fell up to 0.6%, with broad sector

BPI 96.60

- 1Q26 Net income PHP16.9B (+1.8% YoY), revenue PHP50.9B (est. PHP51.56B), NPL ratio 2.42%. CEO TG Limcaoco: cautious amid Middle East conflict but provisions are sufficient.

NIKL 4.95

- **Nickel Asia signed an agreement to acquire a 20% stake in Kazakhstan-based East Copper from Silk Road Resources, gaining indirect exposure to the Karchiga copper mine.**
- Karchiga has annual capacity of 8,500 tons of copper sulfide concentrate and 2,000 tons of copper cathode. The investment marks Nickel Asia’s push to diversify beyond nickel and build a broader Asian natural resources platform.
- **Analysis:** This acquisition aligns with the broader global pivot toward securing critical mineral supply chains and geographic diversification. By moving into Central Asia and broadening its mineral base, NIKL is strategically positioning itself to capture "national security premiums" in the global metals market while simultaneously de-risking its localized operational profile.
- **Recommendation:** MONITOR/ACCUMULATE — Geographic and resource diversification improves the long-term risk-adjusted outlook.

DITO 0.92

- **Dito shares rallied by more than 54%, climbing from a March low of 0.59 to a current level of 0.91.**
- Private Funding and Equity Conversion Improved Financial Outlook & Positive EBITDA Rapid Subscriber Growth & Network Expansion

BPI 96.60

- Net income PHP16.9B (+1.8% YoY), revenue PHP50.9B (est. PHP51.56B), NPL ratio 2.42%. CEO TG Limcaoco: cautious amid Middle East conflict but provisions are sufficient.

NEWS, ANALYSIS , INVESTING INSIGHT

ACEN 2.95

- **Management has signaled plans for an equity raise to fund its aggressive renewable energy (RE) expansion. CEO Eric Francia noted the company is exploring a mix of options, including a potential stock rights offering (SRO), to fund a Php 80 billion capex program aimed at pushing capacity past 8 GW by end-2026.**
- **Analysis:** ACEN's rapid expansion into the RE space is structurally critical—especially given the Philippines' heightened macroeconomic vulnerability to global energy shocks. However, the prospect of a massive equity raise introduces near-term dilution overhang. Execution and timing will depend heavily on external capital market sentiment, inflation, and Middle East geopolitical pressures.
- **Recommendation:** HOLD / MONITOR — Await definitive structural details and pricing of the equity raise before increasing exposure.

GLO 1,648, AC 507.00

- **ST Telemedia Global Data Centres (STT GDC) Philippines will expand its Fairview data center capacity by 4MW, bringing total active capacity to 32MW by year-end. The facility utilizes a modular design scalable up to 124MW and recently secured a 10-year renewable energy pact with MPower.**
- **Analysis:** This development is a direct, localized capitalization of the massive global capital rotation into artificial intelligence (AI) and cloud computing infrastructure. The modular expansion allows for disciplined capex deployment tied directly to client demand, securing long-term recurring revenues. This provides a strong fundamental anchor for joint venture partners Globe (GLO) and Ayala Corp (AC).
- **Recommendation:** HOLD/ACCUMULATE (GLO / AC) — Tangible realization of AI infrastructure demand supporting parent company valuations.

NEWS, ANALYSIS , INVESTING INSIGHT

MEG 2.12

- **Megaworld is scheduled to turn over approximately Php 21 billion worth of residential, commercial, and mixed-use projects this year, including key inventory in Westside City and Northwin Global City.**
- **Analysis:** The realization of this Php 21 billion pipeline provides high visibility into MEG's 2026 revenue recognition and cash flow generation. This reinforces the broader real estate sector's recovery narrative and strengthens the company's balance sheet amidst an elevated interest rate environment.
- **Recommendation:** ACCUMULATE — Strong near-term revenue recognition catalysts.

PSE 215.80

- **The PSE is proposing a regulatory revision to reduce the minimum public offer size for preferred shares drastically, lowering the floor from Php 1.0 billion down to Php 100 million.**
- Analysis: This regulatory easing is a structural positive for market breadth. By lowering the capital barrier, the PSE opens capital market access to Small and Medium Enterprises (SMEs), potentially boosting listing volumes, improving liquidity, and expanding retail participation in a high-yield environment.
- Recommendation: MONITOR — Positive for the PSE’s long-term transaction volume and market depth.

AT 7.85

- **Atlas Mining reported a wider net loss of Php 246.22 million for 2025. Revenue from copper concentrates fell 7.7% to Php 17.19 billion, driven by a severe 18% drop in production volume (down to 124,000 DMT).**
- Analysis: Despite commendable cost-containment execution (mining and milling costs fell 12.7%), fundamental operational metrics have deteriorated. The top-line compression was further exacerbated by a doubling of non-operating charges—including elevated finance costs, fair value losses, and foreign exchange impacts.
- Recommendation: REDUCE / AVOID — Operational execution remains a severe headwind. We advise stepping aside until there is clear evidence of production stabilization and volume recovery.
