U.S. stocks closed lower on Thursday, as investors shifted into a defensive posture following a breakdown in peace negotiations with Iran Oil jumped amid escalation in the Iran war, dimming prospects for an imminent resumption of flows through the Strait of Hormuz.

Oil jumped amid fresh signs of escalation in the Iran war, dimming prospects for an imminent resumption of flows through the Strait of Hormuz. Gold and silver gained

Philippines is set to join JPMorgan Chase & Co.’s premier emerging-market bond index, the Gov Bond Index-Emerging Markets starting 1/29/27. First-ever inclusion for the country's local-currency bonds follows a successful "positive watch" period & extensive market reforms.

The Thai baht, Philippine peso and Indonesian rupiah led the decline among currencies in the developing world

NEWS, ANALYSIS , INVESTING INSIGHT

BPI 95.40
Neutral Rsi 35.20
BPI experienced an increase in Non-Performing Loan (NPL) formation in the 1Q26, indicating emerging pressure on asset quality. Despite a solid balance sheet, the rise in bad loans suggests potential credit cost pressures

JFC 163.40
Shares of Jollibee have slumped to a 51/2y low, trading at levels last seen during the height of the pandemic.
The stock hit a day low of ₱158.40 on April 22, 2026, driven by investor anxiety over a potential exit from the MSCI Philippines Standard Index

As of April 23, 2026, Asian stock markets remain under pressure as the blockade of the Strait of Hormuz and the collapse of weekend peace talks between the US and Iran continue to weigh on investor sentiment.

- Asian stocks fell for a second day, as cloudy chances for peace talks between the US and Iran and higher oil prices due to the Strait of Hormuz blockade weighed on investor sentiment.

ALI 16.34

- **Ayala Land is shifting its strategic focus toward its recurring income streams (commercial leasing and malls) while trimming capital expenditures amid escalating global geopolitical and energy risks.**
- **Analysis:** This confirms our prior observations (e.g., the pausing of the Laurean Residences project). ALI is executing a defensive pivot, prioritizing cash flow preservation and leveraging its mature asset base to weather rising construction costs and macro uncertainties.
- **Recommendation:** HOLD/ACCUMULATE — A prudent capital management strategy that protects the balance sheet. Buy on meaningful dips as the leasing portfolio provides a strong earnings floor.

NEWS, ANALYSIS , INVESTING INSIGHT

GLO 1.650.00

- **Globe has successfully bought back $426 million worth of its perpetual securities.**
- Analysis: **This is highly accretive proactive balance sheet management. By retiring expensive USD-denominated perpetuals, Globe mitigates foreign exchange risk (crucial given the Peso trading near Php 60/USD) and reduces its ongoing dividend/interest burden, ultimately improving equity valuations.**
- Recommendation: **ACCUMULATE — Excellent corporate finance execution that strengthens the capital structure and EPS outlook.**

CEB 32.00

- **Cebu Pacific has extended the suspension of its Dubai flights until the end of May.**
- **Analysis:** This mirrors Philippine Airlines' recent route suspensions and highlights the immediate collateral damage of the US-Iran geopolitical conflict. The suspension cuts off a highly lucrative OFW route, while simultaneously, the airline must contend with surging Brent crude prices nearing $99/bbl.
- **Recommendation:** REDUCE / HOLD — The aviation sector is highly exposed to the dual shocks of rising jet fuel costs and airspace restrictions. Limit exposure until the Middle East geopolitical overhang clears.

MREIT 13.92

- **MREIT is entering a new operational phase by diversifying its asset portfolio.**
- **Analysis:** Moving away from a pure-play office/BPO concentration is a timely strategic evolution. Diversifying into retail, industrial, or mixed-use assets will de-risk the portfolio against hybrid work trends and enhance yield stability.
- **Recommendation:** ACCUMULATE — Portfolio diversification enhances the quality and predictability of its dividend yield.

NEWS, ANALYSIS , INVESTING INSIGHT

PERC 3.74

- **PetroEnergy anticipates that its exploratory oil drilling operations in Africa will be completed by the end of this year.**
- **Analysis:** While PERC's recent narrative has been dominated by successful local renewable energy rollouts (Nabas-2 Wind, Pangasinan Solar), the African drilling campaign introduces a high-reward, speculative catalyst. If commercially viable reserves are proven, it provides massive upside amidst the current global energy shock.
- **Recommendation:** MONITOR / ACCUMULATE — A unique dual-play on stable domestic renewables and high-upside international oil exploration.

FDC 4.80

- A Filinvest subsidiary has successfully secured Energy Regulatory Commission (ERC) approval for a new solar power project in Mindanao.
- **Analysis:** Securing ERC approval accelerates the project's timeline toward commercial operation. This expands the Filinvest conglomerate's recurring utility income and strengthens its renewable energy footprint—highly strategic given the national government's push for domestic power security.
- **Recommendation:** ACCUMULATE (FDC) — Enhances the conglomerate's defensive utility earnings base.

PSE 217.40

- The PSE is looking to lower the minimum public offer size for preferred shares to Php 100 million (from Php 1 billion). This structurally benefits the exchange by attracting SME listings and boosting long-term transaction volume.
- **Recommendation:** MONITOR.
