The S&P 500 and Nasdaq 100 closed off their lows as the VIX held near 19, signaling caution over panic.

- Small caps and equal-weight stocks outperformed market-cap giants, with Energy and Materials leading the way while Communications lagged.
- Markets swung from peace-deal hopes back to deadline fears Monday, but risk appetite held firm.

Oil steady after Trump said the Iran ceasefire ends Wednesday evening Washington time with no likely extension, while traffic through the Strait of Hormuz remains only a trickle.

Markets grew uneasy on Monday as hopes for a quick resolution dimmed, sending oil prices climbing and stocks into a slide.

- **B**rent crude futures surged 5.6% to settle around $95.50 a barrel, while European natural gas prices spiked by as much as 11%.

In commodities, copper, gold and silver pared overnight losses but finished down on the New York session while Bitcoin rallied.

Pakistan may host a second round of US–Iran talks despite rising tensions. Uncertainty looms after the US Navy seized an Iranian cargo ship in the Gulf of Oman, marking the first enforcement of the Strait of Hormuz blockade

Hong Kong is set to see about $110 billion of IPOs and additional financing this year, says Goldman Sachs, with the market seen to have sufficient capital to absorb the offerings.

Philippines's long-term foreign currency debt rating was affirmed by Fitch at BBB, the second-lowest investment grade score.

- Outlook to negative from stable
- Exacerbated in the near-term by elevated exposure to the ongoing global energy shock

This affirmation reflects Philippine baseline that, despite rising risks, medium-term GDP growth for the nation will remain robust, supporting a gradual reduction in government debt says Fitch

Apple CEO Tim Cook is stepping down

- Apple said Cook will step down as CEO, effective September 1, and remain as executive chairman for the company.
- Tim Cook expressed deep gratitude for his tenure, describing his time as Apple CEO as the "greatest privilege" of his life.

China's People's Liberation Army (PLA) dispatched a naval task group to the Western Pacific for rare "far-seas" combat drills.

- Deployment is widely viewed as a direct response to rising tensions with Japan and its deepening military ties with the U.S. and Philippines

As of 2026, the Philippines has 26 operating coal power plants.
- These facilities consist of approximately 57 on-grid boiler units and provide over 50% to 60% of the country's total electricity supply.

The Philippines has started 2026 with a cumulative deficit, largely driven by trade imbalances and external debt servicing. Philippines' balance of payments deficit widened to $2.6b in March from -$2.277b in February.

Amid rising energy costs, Energy Chief Garin that the Philippines is considering further easing restrictions on new coal power plant construction, she explained that coal remains one of the most affordable options for power generation during times of crisis.

The recent traction for SM 629.50, SMPH 19.88, AC 521.0, and ALI 17.22 is driven by their strong 2025 financial performance and their positions as top "buy" picks heading into mid-2026.

PESO WATCH

- **Peso to Move Sideways; Recovery Hinges on US-Iran Ceasefire**
- The peso is expected to trade sideways against the dollar this week, with the market watching for progress in US-Iran negotiations. The currency hit an all-time low of ₱60.748 in late March before partially recovering; analysts note that any sustained ceasefire would ease oil import pressure and support peso stability. The diesel rollback effective April 14 — linked to the temporary ceasefire — provides a near-term inflation floor. BSP held rates steady at 4.25% at its March off-cycle meeting; the April 23 Monetary Board meeting will be closely watched for guidance on whether further hikes are possible if May electricity and fuel cost passthrough accelerates inflation.

IMF-WORLD BANK SPRING MEETINGS + ASIA FOOD SECURITY RISK

- **G**lobal Economy "Under Strain" as IMF/WB Meetings Open April 13–18
- IMF Managing Director Kristalina Georgieva said addressing economic shocks from the Middle East war will be the central agenda of the 2026 Spring Meetings, warning that even in the "most hopeful scenario" there will be a downgrade to global growth as the war has caused permanent damage to energy sectors worldwide.
- The World Bank has separately revised Philippine GDP growth down to 3.7% — the most pessimistic cut yet from a multilateral — while projecting emerging market inflation rising to 4.9%. Adding a second-order risk, fuel and fertilizer shortages from the Strait of Hormuz disruption are threatening rice production across Southeast Asia, with Philippine paddy output potentially falling 10% or roughly 2 million tons this year compounding food inflation risks through the September–October harvest season.
- **Market Implication:** The IMF/WB meetings are unlikely to produce immediate relief for the Philippines but could catalyze emergency lending facilities or coordinated policy guidance. Rice price risk adds to CPI upside; agri-linked conglomerates with diversified food portfolios (JGS, LTG) may face input cost pressures, while grocery retailers face inventory management challenges.

NEWS, ANALYSIS , INVESTING INSIGHT

MER 630.0 Higher rates this April

UBP 24.70

- **Moody's Ratings has affirmed Union Bank of the Philippines' (UnionBank) long-term foreign and local currency issuer and deposit ratings at Baa3, with a stable outlook.**
- A prior downgrade from Baa2 in April 2025, concerns over deteriorating asset quality & sharp rise in NPL's

ALI 16.96

- **Has paused development and sales of its 65-story Laurean Residences in Makati due to surging costs and geopolitical risks, offering buyers options for transfer or full refunds.**
- This is a P28B project with P10.4B in pre-sales, growing pressure on the property sector

RRHI 46.40

- **The Gokongwei family, is taking Robinsons Retail Holdings Inc. (RRHI) private in a transaction valued at PHP17–18.4B (US$280–$850 million).**
- JE Holdings is offering PHP48.30 per share for the remaining shares, providing a "meaningful exit opportunity" for minority shareholders

NEWS, ANALYSIS , INVESTING INSIGHT

ALI 630.00

- **Pauses Laurean Residences Unit Sales Citing Construction Cost Pressures and Delivery Uncertainty from Middle East Crisis**
- Ayala Land has paused sales of its Laurean Residences project in Makati — its flagship Ayala Land Premier luxury tower within the Dela Rosa Gardens mixed-use development — citing increasing pressures on costs and reduced predictability in delivery timelines linked to the evolving global situation, including the Middle East conflict; the company said it is taking a more selective approach to capital allocation by focusing on projects with clearer execution timelines while strengthening its recurring income base, and that it is reaching out to buyers directly to discuss next steps, noting the project has recorded about ₱10.4 billion in sales since its launch. Construction of Laurean began in February 2026. The decision to pause a ₱10.4 billion-in-sales luxury tower — targeting professionals and multi-generational households near Greenbelt — is the most concrete signal to date that the energy crisis is materially disrupting premium residential development timelines, not just market sentiment. ALI shares fell 1.4% to ₱16.96 on Monday.
- **Stance on ALI:** MONITOR — ALI's capital discipline instinct is correct for this environment, and the pause protects buyer trust rather than risking delivery failures. However, the disclosure is also a sector-wide warning signal: if ALI — the most well-capitalized Philippine developer — is pausing a flagship luxury tower due to cost and timeline uncertainty, other developers with thinner margins and less balance sheet depth face amplified risk. ALI's recurring income base (Ayala Malls, office leasing) provides the earnings floor. Watch for Q1 2026 real estate sales reservation data for the broader pipeline impact.

NEWS, ANALYSIS , INVESTING INSIGHT

GTCAP 503.00

- **FNG Sees No Sales Slowdown; Data-Driven Launch Timing Discipline Adopted Amid Global Uncertainty**
- FNG President Thomas Mirasol confirmed no notable drop in sales velocity since February — with March performing well and April looking at least as strong — but emphasized the company is "taking extra care" to ensure demand is sustainable before committing to new project launches, particularly the second phase of Riverpark North Commercial Lots (~20 hectares); FNG's approach is explicitly data-driven, anchoring new launches on letters of intent and expressions of interest rather than market assumptions. The ₱3–₱3.5 billion capex commitment from parent Federal Land is intact, and FNG's Yume at Riverpark residential community is at 94% site development construction, targeted for turnover within 2026. The UNIQLO Southeast Asia logistics warehouse — the largest UNIQLO facility in the region — was formally inaugurated on April 17 at Riverpark North.
- **Stance on GTC:** ACCUMULATE — This disclosure reinforces the April 20 story: FNG is the model for responsible township development in a volatile environment — committed capex, live demand signals, and launch discipline. GT Capital's ₱9.16 billion direct stake acquisition in FNG at ₱100/share aligns parent and JV interests. GT Capital shares at ₱500 remain compelling given the Riverpark 30-year development thesis.

FLI 0.75

- **Opens One Filinvest LEED Gold Office Tower in Ortigas; 38,986 sqm Targets Tech, Pharma, BPO Tenants**
- Filinvest Land inaugurated One Filinvest — a 34-story, LEED Gold-certified premium office tower in the Ortigas CBD featuring approximately 38,986 sqm of gross leasable space — amid sustained demand from companies prioritizing high-quality, sustainable office environments; tenants include multinationals from technology, pharmaceutical, and entertainment sectors, with additional multinational and BPO operators expected in coming months. FLI reported 23% growth in leasing transactions in 2025, a 60% system-wide office occupancy rate, and a 93% lease renewal rate — a flight-to-quality dynamic that specifically benefits premium, LEED-certified product like One Filinvest. The tower expands FLI's office footprint beyond its core Northgate Cyberzone in Alabang to strategic positions in Ortigas, Makati, Quezon City, Pasay, Cebu, and Clark.
- **Stance on FLI: MONITOR-to-ACCUMULATE** — Premium LEED-certified office with 93% renewal rates in a flight-to-quality market is a quality recurring income addition. The macro headwinds affecting residential sales (ALI's Laurean pause being the leading indicator) make FLI's leasing business the earnings stabilizer. Watch for One Filinvest occupancy milestones in H2 2026 disclosures.

NEWS, ANALYSIS , INVESTING INSIGHT

VLL 1.02

- **Files Motion for DOJ Dismissal; Senators Mark and Camille Villar Appear for Counter-Affidavit Submission**
- Villar Land and its directors — including Senators Mark and Camille Villar — submitted their counter-affidavits and a verified manifestation and motion before the DOJ panel during Monday's preliminary investigation of the SEC's criminal complaint alleging market manipulation, insider trading, and misleading disclosures; the DOJ panel said it is treating the motion as a counter-affidavit, and noted it is premature to rule on the prayer for dismissal, with the next hearing set for May 13 when the SEC will submit its reply. The SEC complaint centers on VLL's 2024 financial statements that reported ₱1.33 trillion in total assets and nearly ₱1 trillion in net income — attributed to a massive real estate revaluation — which the regulator alleged were disclosed before the external audit was complete; the company's subsequently audited financials showed total assets of just ₱35.7 billion. RAPPLER Despite the governance overhang, VLL shares rose 3.29% to ₱439 on Monday.
- **Stance on VLL: AVOID (GOVERNANCE WATCH)** — The core allegation — that financials reporting ₱1.33 trillion in assets were disclosed before the audit was complete, and audited figures came in at ₱35.7 billion — represents a material governance failure if proven. The preliminary investigation remains at an early stage (next hearing May 13), but the reputational and legal risk makes VLL uninvestable for institutional-standard ESG mandates until the case is resolved.

FPH 77.90

- **Defers 2026 Annual Stockholders' Meeting Indefinitely Due to Lopez Family Legal Dispute**
- First Philippine Holdings Corp. has postponed its 2026 Annual Stockholders' Meeting — originally scheduled for May 28 — indefinitely, with the board agreeing to defer it until the ongoing legal conflict between FPH Chairman and CEO Federico "Piki" R. Lopez and Lopez Inc. is resolved; critically, the uncertainty has also begun affecting financing arrangements, as FGEN's ₱24.75 billion BDO standby credit comes with conditions requiring leadership stability, meaning a major leadership change involving Piki and his key executives could trigger a default on existing group loans. Lopez Inc. sits atop the group, controlling FPH, FGEN, and Energy Development Corp. The deferral is effectively a signal that the board cannot proceed with routine governance while the court battle over Piki's ouster as Lopez Inc. president remains unresolved.
- **Stance on FPH:** GOVERNANCE WATCH — The BDO loan covenant linkage is the material new risk: a leadership change at FPH now carries potential cross-default implications across the group's credit facilities. For FGEN in particular — with its critical role in Luzon's gas and RE power supply during the energy emergency — governance instability could not come at a worse time.
- **Stance on FGEN:** MONITOR — Operationally sound, but governance overhang limits re-rating potential until the Lopez dispute is resolved. The loan covenant exposure is the key risk to track.

NEWS, ANALYSIS , INVESTING INSIGHT

- **ABS 3.20, ABSP 3.00**
- Full-Year 2025 Attributable Net Loss Widens to ₱4.39 Billion; But Underlying Improvement Visible as Costs Fall Faster Than Revenue
- ABS-CBN's full-year 2025 consolidated net loss dropped to ₱4.72 billion from ₱6.09 billion in 2024 — a 23% improvement — driven by an 18% reduction in operating expenses to ₱20.48 billion, even as revenue fell 9% to ₱15.85 billion; cable TV and broadband revenue plunged 39% to ₱3.27 billion due to ongoing subscriber losses following the 2020 franchise loss, while content advertising and consumer revenues (including election-related placements, hit programs, and Star Cinema's top three highest-grossing Filipino films) rose 5% to ₱12.59 billion. The attributable net loss of ₱4.39 billion referenced in the BW headline reflects the parent-level figure (consolidated net loss was ₱4.72 billion); a ₱1.40 billion one-time property sale loss — arising from the sale of most of the Mother Ignacia headquarters to ALI for ₱6.2 billion — masked the underlying recurring improvement. BPI debt (₱5 billion) was extended to April 30, 2026; UnionBank debt (₱4.75 billion) extended to June 30, 2026. ABS-CBN shares fell 1.84% to ₱3.20.
- **Stance on ABS, ABSP:** AVOID — The recovery path is real but fragile: cost cuts are driving improvement, not revenue growth; cable continues to bleed; and critical debt maturities loom (BPI April 30, UnionBank June 30). The Lopez family governance dispute adds uncertainty. Until ABSP demonstrates a sustainable revenue turnaround and resolves near-term debt obligations, the governance-financial double risk warrants continued avoidance for equity investors.

NEWS, ANALYSIS , INVESTING INSIGHT

MER 630.00

- **Exits Bayad; Meralco and CIS Sell 90% of CIS Bayad Center to Kayana Solutions (PLDT-backed)**
- Meralco and its subsidiary CIS agreed to sell their 5% and 85% stakes, respectively, in CIS Bayad Center (Bayad) to Kayana Solutions — which already holds the remaining 10% — giving Kayana full ownership of the payment collection platform; Kayana is itself jointly owned by PLDT (45%), Meralco, and Metro Pacific Investments Corp. (each 27.5%), meaning the transaction effectively consolidates Bayad's ownership under the broader MVP Group's digital financial infrastructure. Bayad serves over 800 billers and operates a network of 104,000+ payment touchpoints nationwide. The deal is subject to conditions precedent. For Meralco, the exit refocuses the company on its core electricity distribution and MPower retail energy businesses — consistent with the strategic logic of MPower's 10-year data center RE deals (e.g., STT GDC) rather than payments infrastructure. For PLDT (TEL), Bayad consolidation under Kayana strengthens its digital payments ecosystem.
- **Stance on MER: ACCUMULATE** — Portfolio rationalization is positive. Meralco exits a business that was strategically peripheral to its power utility core and reallocates focus toward higher-value, recurring energy supply contracts (MPower). The transaction also de-risks regulatory complexity.
- **Stance on TEL: MONITOR** — Bayad consolidation reinforces PLDT's digital ecosystem but the transformative upside depends on Bayad's ability to expand beyond traditional bill payment into broader fintech services.

NEWS, ANALYSIS , INVESTING INSIGHT

MWIDE 2.92

- **Redeems ₱1.5 Billion Series 5 Preferred Shares; Targets ₱4 Billion Preferred Share Level in Medium Term**
- Megawide redeemed its maturing Series 5 preferred shares on April 17, reducing its total preferred share stack from ₱8.2 billion toward a target of approximately ₱4.0 billion in the medium term; the redemption was executed to lower the cost of funding and generate cash savings, with Megawide CEO Edgar Saavedra noting substantial improvement in debt levels already visible in Q1 2026. The Series 5 preferred shares were issued in 2023 with a 7.9% dividend rate, and carried a step-up feature had they not been redeemed on their third anniversary. Megawide's 2025 order book reached ₱50 billion (+50% from 2024), with residential at 35%, office/commercial at 28%, 4PH socialized housing at 23%, and infrastructure at 15%. The 4PH pipeline — targeting 100,000 socialized housing units over the next 5–7 years — is now Megawide's structural growth anchor.
- **Stance on MWIDE: MONITOR-to-ACCUMULATE —** Balance sheet discipline is commendable: ₱50 billion order book, debt reduction trajectory, and the option to shift dividend strategy to attract common shareholders are all positive signals. The 4PH segment provides counter-cyclical demand resilience. Watch for Q1 2026 revenue recognition and margin data, particularly given rising construction input costs from the energy crisis

NEWS, ANALYSIS , INVESTING INSIGHT

PERC 3.62

- **PetroEnergy Resources Corp. / PetroGreen Energy Corp.**
- **Nabas-2 Wind Farm in Aklan Nears Commercial Operations; PGEC Also Starts Testing 25MW Pangasinan Solar**
- PetroGreen Energy Corp. (PGEC), the Yuchengco-led renewable energy arm of PetroEnergy Resources Corp. (PERC), is preparing to start commercial operations of its 13.2-MW Nabas-2 wind project in Aklan after receiving the Final Certificate of Approval to Connect from NGCP; the project is located south of the existing 36-MW Nabas-1 facility and awaits only the Energy Regulatory Commission's Certificate of Compliance before commercial operations commence. The project, which represents a ₱2.57 billion investment backed by PetroWind (a JV of PGEC, EEI Power, and Thailand's BCPG), holds a 20-year offtake contract secured under the DoE's Green Energy Auction 1 and will supply clean power to Boracay, Caticlan, and surrounding Aklan communities. Separately, PGEC's Rizal Green Energy subsidiary (with Japan's Taisei Corp.) has also started testing its 25-MW Bugallon solar plant in Pangasinan. In the context of the national energy emergency, bringing new domestic renewable capacity online is strategically significant for energy security.
- **Stance on PERC:** ACCUMULATE — Dual RE milestones — Nabas-2 wind (GEA-1 offtake) and Pangasinan solar (GEA-2 offtake) — both with 20-year contracted revenues, provide high-quality income visibility. PERC's RE portfolio expansion accelerates its transition from a fossil-dependent to a predominantly green earnings base. On-air line: "As the Philippines fights its worst fuel crisis, PetroEnergy's wind and solar farms are about to light up Boracay and Pangasinan — clean, home-grown power that doesn't depend on the Strait of Hormuz."
