GLOBAL MARKETS OVERVIEW — May 29, 2026 (May 28 Session)

Note: US crude oil (WTI) fell sharply -4.77% and Brent -5.18% on Iran deal optimism (tentative ceasefire extension). Philippine market PSEi closed at 5,859.94 (-1.73%) — DQR authoritative close, not the 5,963.24 figure in brief (which was prior close).

United States & PSEi

The May 28 DQR confirms net foreign selling of PHP 517.08 million (approximately USD 8.4 million at the PHP 61.56 exchange rate) — a significant session outflow that pushed the cumulative YTD net foreign selling figure above the USD 100 million threshold, a psychologically critical milestone. Massive block sales dominated the session: TOP LINE (TOP) registered a PHP 238 million block at PHP 1.40 (170 million shares) — a stark capitulation signal; AC Preference Shares (ACPB3) transacted PHP 150 million; JGS PHP 170 million across two tranches; SEVN PHP 66 million (2 million shares); ICT PHP 121 million. Share buybacks: SMPH, SM, FRUIT — providing technical support at current levels.

GLOBAL MARKETS COMMENTARY

The dominant global development of the May 28–29 session is the sharp pullback in crude oil — WTI fell 4.77% to USD 88.44 and Brent declined 5.18% to USD 93.71 — driven by US-Iran ceasefire extension news and reports of tentative deal progress. This is the single most important macro variable for the Philippines: Brent sustaining below USD 95 would be the clearest possible catalyst for BSP rate-hike moderation, peso stabilisation, and import inflation containment. However, the US simultaneously carried out self-defense airstrikes against Iranian military targets near the Strait of Hormuz — a contradiction of the deal narrative that keeps binary risk firmly alive. The market is trying to price a peace deal and armed clashes simultaneously, creating the oscillating oil volatility pattern we have seen all week.

US equities rose modestly — S&P 500 +0.58%, Nasdaq +0.91% — with chip stocks continuing to outperform as Snowflake's extraordinary results (shares +36–39% on a blowout Q1 FY2027 report and a USD 6 billion AWS partnership) reinforced the AI-infrastructure spending thesis. Bond markets rallied sharply: US 10-year fell to 4.446% from 4.502% as the oil drop dampened inflation expectations. Philippine 10-year also fell to 7.525% — a third consecutive session of yield compression. This bond rally is the Philippines' most constructive macro signal: if sustained, it reduces the BSP's urgency for an aggressive hike, supports property valuations, and begins to restore the dividend yield attractiveness of REITs and dividend plays.

Asia presented a mixed picture. Nikkei added 0.66%; Korea's KOSPI gained 1.90% after a cooling from its extraordinary 7.60% session. Taiwan fell 1.40%, partially giving back recent AI-driven gains. China's SHCOMP was nearly flat (+0.12%). More concerning: Singapore's STI fell 0.79%, Hang Seng -1.27%, ASEAN indices broadly declining — a regional risk-off signal that mirrors the PSEi's own May 28 correction. Traders are now pricing in a near-certainty of 75 basis points of cumulative BSP rate hikes by year-end — a significant recalibration that will weigh on valuation multiples even as earnings quality improves.

PHILIPPINES MACRO WATCH

The PSEi's May 28 close of 5,859.94 (-1.73%, -103.30 pts) is the sharpest single-session decline in the index in weeks — all six sectors fell, with Holdings (-2.61%), Mining/Oil (-2.44%), and Financials (-1.94%) leading losses. The session confirms that the PSEi's 6,000 level was a resistance ceiling, not a new base. The index has now retraced to the lower end of the 5,800–6,000 range identified as the critical support band for May. Volume turnover of PHP 5.65 billion was elevated, suggesting distribution rather than consolidation.

The YTD net foreign selling figure has now breached USD 100 million — a milestone that brings additional analytical focus from international fund managers who use this as a benchmark for sovereign rebalancing. The PHP 517 million in May 28 session outflows adds to a deeply negative May pattern. However, it is important to note the context: the PSEi at approximately 9x earnings remains one of the cheapest markets in Southeast Asia, and the domestic corporate earnings season — FGEN, GSMI, MWIDE — continues to deliver credible results. The disconnect between valuation and flows is the defining tension of this market.

The PHL 10-year bond yield falling to 7.525% from 7.554% is a third consecutive session of compression — now down 22 basis points from the 7.715% peak seen last week. This bond rally is telling: if the market believed 75 bps of BSP hikes were certain and imminent, bonds would be selling off, not rallying. The interpretation is that the market is weighing oil's decline as an offsetting force to the BSP's hawkish signal. A confirmed US-Iran peace deal — the subject of active speculation — would materially reduce the inflationary impulse and could allow BSP to calibrate a smaller or phased hike. Watch oil closely: USD 88–90 WTI is the key zone.

CORPORATE UPDATES

[FGEN] First Gen Corp.: Pumped-Storage Hydro Investments Seen Yielding PHP 16 Billion Annually by 2031

Lopez-led First Gen Corp. (FGEN) revealed at its annual stockholders' meeting on May 28 that its PHP 62-billion committed investment in Prime Infrastructure Capital's pumped-storage hydropower (PSH) portfolio is projected to contribute approximately PHP 16 billion annually to its bottom line beginning 2031 — representing roughly three times the historical average contribution of FGEN's former 60% natural gas stake, which was divested to Prime Infra in 2025. The portfolio comprises the 1,400-megawatt Pakil PSH facility in Laguna, the 600-MW Wawa PSH project in Rizal, and the adjacent 120-MW Aya PSH project — for a combined capacity of over 2,000 MW of long-duration storage. FGEN holds a 33% stake in Prime Infra's PSH portfolio through FGEN Aqua Power Holdings, Inc. All three projects carry 20-year government offtake contracts awarded through the DOE's Green Energy Auction Program (GEAP). FGEN President and COO Francis Giles Puno described pumped-storage hydro as 'uniquely suited for the next phase of the country's energy transition,' noting that unlike battery systems, PSH facilities can deliver long-duration storage continuously for up to 10 hours. After the natural gas sale, approximately 92% of FGEN's asset base now consists of renewable energy investments. BDO Unibank extended PHP 24.75 billion in standby letters of credit (SBLCs) to support the Prime Infra stake acquisition.
Analysis: FGEN's P16B/year hydro earnings projection by 2031 is a compelling long-duration investment thesis — but one that requires patience: construction timelines run to 2030 with no meaningful cash flow until facilities reach commercial operation. The divestment of natural gas assets weighed on Q1 2026 earnings, creating a temporary earnings trough that patient investors can use as an accumulation window. The 20-year GEAP contract provides earnings visibility that is rare in the Philippine listed universe. FGEN at PHP 15.60 (May 28 DQR) is down from the PHP 16+ range and approaching the RSI oversold zone — a technical setup that may be aligning with the long-duration fundamental opportunity. Accumulate with a 2029–2031 catalyst horizon.

🟢 **Stance: ACCUMULATE | FGEN — PHP 16B/yr hydro earnings by 2031; 92% RE portfolio; 20-yr GEAP contract; at technical support**

[TEL] PLDT Home to Bundle Internet with Solar Power — Industry First in Philippine Telco

PLDT Inc. (TEL) announced that its residential broadband arm, PLDT Home, is exploring a partnership with a leading solar energy provider to offer a combined internet and solar power package to Filipino households — what the company described as 'another first in the Philippine telco industry.' PLDT Chief Operating Officer Butch Jimenez said the initiative would allow customers to have solar panels installed together with fiber internet in a single engagement: 'If people can have solar panels installed together with internet in one go, it should be very compelling for our customers, especially the ones who wish to future-proof their homes.' The bundled offering would help subscribers stay connected while managing rising electricity costs — a direct response to the Iran-linked energy price shock and the BSP's inflationary environment. PLDT did not disclose the solar partner's name or a specific launch timeline, but confirmed active partnership negotiations are underway. The announcement builds on PLDT Smart's ongoing solarization of cell sites and the VITRO-BBIX internet exchange peering expansion announced earlier this week.
Analysis: The PLDT Home internet-solar bundle is a genuinely innovative customer-retention play: by locking households into a dual-service relationship (internet + clean energy), PLDT creates higher switching costs and new revenue streams at a time when its core telco business faces competitive pressure from DITO and Converge. The timing is strategic — energy costs are elevated and households are actively seeking electricity bill relief. CNVRG at PHP 10.38 was the standout in the most active table by value (PHP 173M) and was foreign-bought on May 28 — a signal that investors are positioning in connectivity names as the AI infrastructure and internet economy themes build. TEL at PHP 1,184 is technically in oversold territory.

🟢 **Stance: ACCUMULATE | TEL — Internet+solar bundle adds lock-in + RE revenue; VITRO peering expansion; technically oversold**

[REDC] Repower Energy Acquires 40% Stake in Samar Hydropower Plant in P3.925-Billion Deal

Repower Energy Development Corp. (REDC) disclosed a PHP 3.925-billion acquisition of a 40% stake in Taft Hydro Energy Corp. — the owner of a 15.93-megawatt operational hydropower plant in Samar province — alongside Japan's Tokai Corp. and South Eastern Energy Corp. Taft Hydro's facility is estimated to generate approximately 71 gigawatt-hours of electricity annually. The transaction makes Taft Hydro REDC's 10th operational hydropower plant and boosts the company's total hydropower capacity by approximately 45%. REDC President and CEO Eric Peter Roxas said the acquisition will further grow REDC's hydropower portfolio and 'contribute to and increase the company's income and cash flow.' REDC is the hydropower development arm of a publicly listed entity and has been systematically expanding its run-of-river portfolio across the Philippines.
Analysis: REDC's Samar acquisition is the latest signal that Philippines hydropower M&A is accelerating — driven by the GEAP, energy grid stress, and the confluence of FGEN (PSH), First Gen (Wawa/Pakil), and now REDC adding run-of-river capacity at scale. A 45% capacity addition from a single transaction is material. The Japanese partnership (Tokai Corp.) brings institutional credibility and potential access to low-cost yen financing. The asset's estimated 71 GWh/year of generation aligns with grid-support needs highlighted by the ongoing yellow alert pattern in the Visayas. Watch for REDC's earnings disclosure to calibrate the financial impact.

🟢 **Stance: ACCUMULATE | REDC — 10th hydro plant; +45% capacity; Japan partnership; RE supply expansion accelerating**

Friday, May 29, 2026

[GSMI] Ginebra San Miguel Q1 2026 Net Income Surges 9% to PHP 2.3B; 12th Consecutive Volume Record

Ginebra San Miguel, Inc. (GSMI), the spirits arm of San Miguel Corp. (SMC), reported first-quarter 2026 net income of PHP 2.3 billion — up 9% from PHP 2.1 billion in Q1 2025 — driven by improved margins, lower molasses costs, and disciplined execution. Consolidated revenues grew 3% year-on-year to PHP 16.7 billion from PHP 16.3 billion. Gross profit rose 11% to PHP 4.5 billion, reflecting higher selling prices, better distillery efficiencies, and reduced raw material costs. GSMI President and CEO Ramon S. Ang cited focused execution and market share expansion as the key drivers. The Q1 result builds on GSMI's full-year 2025 performance, in which the company posted its 12th consecutive year of volume growth — selling a record 51 million cases. The 'Kabayani Kita sa One Ginebra Nation' campaign and the 'Ginstanalo sa One Ginebra Nation' consumer promotion were cited as key contributors to volume and market share performance in Luzon, Visayas, and Mindanao. Secondary brands including Vino Kulafu, GSM Blue, and Primera Light Brandy also posted growth.
Analysis: GSMI's 9% Q1 earnings growth on a 3% revenue increase is a margin expansion story — the gross profit rise of 11% confirms that lower molasses costs and pricing discipline are translating directly to the bottom line. As an SMC subsidiary operating in the consumer staples space (spirits are arguably defensive), GSMI is one of the few names in the broader SMC ecosystem with a clean, consistent earnings trajectory. The 12-year consecutive volume growth record is a remarkable brand durability signal. GSMI at PHP 270.80 (DQR close) is a quality defensive compounder within the SMC complex. Accumulate for income and consumer brand exposure.

🟢 **Stance: ACCUMULATE | GSMI — Q1 +9% net income; margin expansion; 12th consecutive volume record; SMC defensive arm**

[FILRT / FLI] Filinvest REIT and Filinvest Land Added to ATRAM Philippine SDG Equity Fund

Filinvest REIT Corp. (FILRT) and Filinvest Land, Inc. (FLI) have been included in the ATRAM Philippine Sustainable Development and Growth (SDG) Fund — a local equity fund that selects companies meeting environmental, social, and governance (ESG) criteria alongside financial performance benchmarks. The inclusion signals institutional recognition of Filinvest's ESG credentials: FLI's office leasing portfolio recorded PHP 1.26 billion in Q1 revenues and a 100% lease renewal rate; FILRT's portfolio expansion through the Gatestone & Co. multinational lease in Northgate Cyberzone added a globally recognised BPO tenant. The ATRAM SDG Fund specifically screens for companies with demonstrated sustainability practices, clear governance frameworks, and positive community impact — criteria that align with Filinvest's ongoing renewable energy adoption and green building certification programmes. Inclusion in ESG-focused funds expands the investor base to include sustainability-mandated domestic and foreign institutions.
Analysis: ATRAM SDG Fund inclusion is a long-term positive for FILRT and FLI — it expands the investor universe to ESG-mandated capital, which is increasingly significant as Philippine institutional asset managers adopt sustainability screens. For FILRT specifically, the REIT's green building credentials and multinational tenant base align with the screening criteria. FILRT at PHP 2.91 (May 28 DQR) and FLI at PHP 0.69 remain at compressed valuations despite improving fundamentals. The ESG inclusion narrative, combined with the PHP 9B bond offer closed and the 17% mall leasing revenue surge, provides a multi-pronged re-rating case. Accumulate with patience.

🟢 **Stance: ACCUMULATE | FILRT — ATRAM SDG inclusion expands ESG investor base; PHP 2.91 DQR at discount to fundamentals | ACCUMULATE | FLI — PHP 4.1B inventory cut + SDG fund anchor**

[SECTOR / SM] Property Market Fundamentals Intact — Leechiu; SM Opens Government Services Hub in San Pedro, Laguna

Property consultancy Leechiu Property Consultants (LPC) maintained its view that Philippine real estate market fundamentals remain intact, noting that while demand is selective amid the Iran oil shock and BSP tightening cycle, the underlying drivers — young population, price appreciation of 51% since 2019, 95% domestic buyer composition, and recovering international arrivals — continue to support long-term market resilience. Q1 2026 Metro Manila residential demand rose 19% year-on-year to 7,732 units, according to LPC. Office and residential segments showed signs of recovery but remain vulnerable to Iran conflict-driven financing cost increases. LPC urged investors to lock in financing at current rates. Separately, SM Investments Corp. (SM) opened a government services hub at SM City San Pedro in Laguna — consolidating key government services including PSA, LTO, SSS, Pag-IBIG, and PhilHealth within a single mall location, making public services more accessible for residents in the fast-growing San Pedro-Biñan corridor south of Metro Manila.
Analysis: LPC's 'fundamentals intact' assessment amid a 19% Q1 demand recovery is a constructive signal for the property sector despite the macro headwinds. The SM Government Services Hub in San Pedro reflects SM's integrated development model — using malls as community anchors that drive footfall while serving civic needs. This strategy deepens SM's presence in high-growth secondary cities (San Pedro is one of Laguna's fastest-growing cities) and differentiates SM malls from standalone retail competitors. SM at PHP 598 (May 28 DQR close) was the No. 10 most active at PHP 163M value. Despite the session's 3.86% decline from the May 26 close, SM's long-term diversification and community integration story remains intact.

🟡 **Stance: MONITOR | SMPH / SM — Property fundamentals intact per Leechiu; government hub model deepens community anchor; session weakness reflects broad market selloff; accumulate below PHP 580**
