Foreign investors were net sellers for USD 3.876M on May 25, bringing MTD net foreign selling to USD 266.467M and YTD net foreign selling to USD 86.042M. The session saw meaningful institutional buying in financials (BDO, BPI, EW), utilities (MER, SGP, SCC), and infrastructure (ICT, GTCAP). Selling was concentrated in banks (MBT, CBC, SECB), energy (ACEN, FGEN, MWC, PCOR), property (MEG, RCR, AREIT), and telcos (GLO, TEL). Block sales totalled PHP 2.316B, dominated by ICT (PHP 1.88B across two tranches) and BDO (PHP 224M). Share buybacks: SMC, SMPH.

GLOBAL MARKETS COMMENTARY

Asian equity markets rose for a third consecutive session on Monday May 26, propelled by the twin engines of AI-driven tech optimism and growing confidence in a US-Iran peace deal. The Nikkei 225 surged another 2.68% to 65,158 and the TWSE jumped 5.50% — remarkable single-session gains that reflect the powerful confluence of Nvidia's earnings afterglow and improving geopolitical risk sentiment. Importantly, Wall Street was closed for the Memorial Day holiday, meaning the Asian rally ran without the anchor of US cash market pricing — a dynamic that historically amplifies both upside and downside moves in Asian bourses.

Oil dropped sharply as US-Iran negotiations advanced. WTI fell 4.84% to USD 91.93/bbl and Brent retreated 4.84% to USD 98.53/bbl — falling below the critical USD 100 level for the first time in weeks. This is structurally positive for the Philippines as a near-total crude importer: every sustained USD 5/bbl decline in Brent improves the country's current account by approximately USD 800 million annually. Iran's Foreign Ministry, however, tempered expectations by clarifying that while consensus was reached on many topics, 'no one can claim the signing of an agreement is imminent' — language that warns against premature celebration. Trump's simultaneous statement that the Hormuz blockade would remain 'until an agreement is completed' keeps binary risk firmly on the table.

FIRST NEWS

Employing Intelligent Investing

Tuesday, May 26, 2026

Bond markets rallied sharply. The Philippine 10-year bond yield fell to 7.548% from 7.715% — a 16.7 basis point compression in a single session, one of the sharpest domestic yield moves in recent memory. The US 10-year fell to 4.479% from 4.572% on the Iran de-escalation trade. This is significant: Deutsche Bank Research flagged that the next BSP rate hike could be 50 basis points rather than the standard 25 bps, yet the bond market rallied hard — suggesting that oil's collapse is being read as an inflation moderator that could reduce the magnitude of eventual tightening. The Treasury's T-bill auction results were mixed (the 363-day bill at 6.163% was above expectations; the 181-day bill at 5.70% was below) — a split result that signals uncertainty about the rate path.

PHILIPPINES MACRO WATCH

The BSP's hawkish shift, announced May 25, is calibrating against new information. The central bank has signaled it will allow banks to tap extra capital buffers for crisis lending while preparing a 'bold rate move' to stay ahead of inflation. But with oil now below USD 100 on Iran deal expectations, the inflation impulse from energy imports — the primary driver of the BSP's hawkish turn — may be moderating. A confirmed Iran deal could give the BSP room to calibrate a smaller or delayed hike; the absence of a deal keeps 50 bps on the table.

The T-bill auction on May 26 offers the first hard data point on institutional demand under the new hawkish regime. The mixed results — 363-day bill yield rising to 6.163% (above expectations) while the 181-day fell to 5.70% — suggest duration risk aversion at the long end offset by demand for short-dated paper. Watch the May 26 fixed-rate bond auctions: PHP 10B in the 5.925% 2036 bonds and PHP 20B in the 6.375% 2030 bonds will test both pricing and demand appetite.

The PSEi at 6,009.38 has now convincingly broken through the 6,000 level — a psychologically significant milestone described in market commentary as a 'critical test of long-term support.' The base case target remains 6,500 with bear-case floor at 5,500. At approximately 9x earnings, the Philippines is one of the cheapest markets in Southeast Asia on a forward earnings basis — a valuation that argues for selective accumulation in defensive, margin-resilient names with clear near-term catalysts.

CORPORATE UPDATES

[BDO] BDO Unibank Declares Q2 2026 Cash Dividend of PHP 1.10 Per Share

BDO Unibank, Inc. (BDO) declared a regular quarterly cash dividend of PHP 1.10 per common share for the second quarter of 2026, payable on June 22, 2026 to shareholders of record as of June 9, 2026. The dividend declaration reaffirms BDO's consistent capital return policy and signals board confidence in the bank's earnings trajectory despite a challenging macro environment. This follows Moody's recent Baa2 rating affirmation with a stable outlook, which recognized BDO's strong liquidity (132% coverage ratio), low reliance on market funding (6% of tangible banking assets), and resilient credit profile. The foreign investor community returned as net buyers of BDO on May 25, contributing to PHP 302 million in value turnover — the second highest of the session.

Analysis: The PHP 1.10 Q2 dividend confirms BDO's capital generation capacity and is a positive income-oriented signal. The stock at PHP 117.20 (May 25 DQR close) is up meaningfully from the PHP 114 level seen earlier in the week. Block sales in BDO totalled PHP 224M across two tranches at PHP 114.90–114.44 — institutional repositioning rather than distribution. The dividend yield at current levels remains competitive against rising bond rates. Accumulate BDO as the income anchor in a banking sector with confirmed investment-grade ratings.

● **Stance: ACCUMULATE | BDO — Q2 dividend PHP 1.10/share; Moody's Baa2; foreign buying confirmed**

[FLI / FILRT] Filinvest Land Cuts PHP 4.1B Residential Inventory; FILRT Signs Multinational Office Lease

Filinvest Land, Inc. (FLI) reinforced its balance sheet by slashing unsold residential inventory by PHP 4.1 billion in Q1 2026, driven by record ready-for-occupancy (RFO) sales of PHP 1.7 billion. CEO Tristan Las Marias said the capital efficiency strategy unlocks liquidity for high-value investment opportunities. Q1 consolidated revenues rose 4.5% to PHP 6.31 billion, net income grew 4.5% to PHP 1.10 billion, mall leasing revenues increased 17% to PHP 744 million, and office leasing revenues hit PHP 1.26 billion with a 100% lease renewal rate. Separately, Filinvest REIT Corp. (FILRT) disclosed a new office lease of nearly 3,500 sqm with Gatestone & Co. — a global customer experience and digital transformation firm — at Filinvest Three in Alabang within Northgate Cyberzone, deepening the multinational tenant roster. Additionally, FLI's PHP 9 billion bond offering (7.3993% p.a., 3.5-year tenor) is in its final days of subscription, closing May 26.

Analysis: FLI's PHP 4.1B inventory drawdown is the most decisive balance sheet action in the sector this quarter and directly addresses the primary investor concern: capital tied up in slow-moving pre-selling inventory. The FILRT Gatestone lease adds a globally recognised BPO/CX brand to Northgate Cyberzone — a quality signal for the REIT's office portfolio. The 7.3993% bond rate is notably above prevailing T-bill rates, reflecting market-driven yield discovery in a hawkish environment. FLI at PHP 0.71 (DQR close) is trading at a distressed valuation relative to net asset value; the operational improvements argue for a patient accumulation approach.

● **Stance: ACCUMULATE | FLI — PHP 4.1B inventory cut; balance sheet repair; FILRT multinational lease adds quality**

[SM] SM Investments Lifts Renewable Energy Share to 31% of Total Consumption in 2025

SM Investments Corporation (SMIC) disclosed that the SM Group sourced 31% of its total electricity consumption from renewable energy in 2025, up from 27% in 2024. The group consumed approximately 730 million kilowatt-hours of renewable electricity during the year, avoiding 370,644 metric tons of carbon emissions — equivalent to removing around 297,000 electric-powered vehicles from the road for one year. President and CEO Frederic DyBuncio described the renewable shift as 'both a sustainability and business decision,' noting its role in managing long-term energy costs and building operational resilience. The initiative is anchored on the

FIRST NEWS

Employing Intelligent Investing

Tuesday, May 26, 2026

Philippine Geothermal Production Company (PGPC), SMIC's wholly-owned subsidiary that operates the Mak-Ban and Tiwi geothermal fields capable of generating up to 400 MW of clean energy. Share buybacks in SMPH were also confirmed for the session.

Analysis: SM's 31% RE penetration is a material operational de-risking move in the context of Iran-driven energy price volatility. Every percentage point shift to renewable energy reduces SM Group's exposure to fuel-cost pass-through in its malls, hotels, and office operations. The geothermal anchor via PGPC also positions SMIC as a clean energy producer — an underappreciated segment with significant strategic value as the Philippines pursues energy security. SM at PHP 612 was foreign-bought on May 25. The SMPH buyback program provides technical floor support. Accumulate SM for the energy-resilient conglomerate narrative.

● **Stance: ACCUMULATE | SM — 31% RE milestone; geothermal platform; SMPH buyback support; foreign bought**

[MPI / GTCAP] MPTC Invests PHP 193M to Maintain 44.9% Stake in Vietnam Toll Road; CALAX 84.67% Complete

Metro Pacific Tollways Corporation (MPTC), the toll road arm of Metro Pacific Investments Corp. (MPI) and a key subsidiary of GT Capital Holdings (GTCAP), subscribed to 8.67 million newly issued shares of CII Bridges and Roads Investment JSC (CII B&R) in Vietnam for approximately PHP 193 million. The transaction preserves MPTC's combined 44.9% stake — 40.85% direct and 4.09% through Metro Pacific Tollways Vietnam Co. Ltd. — in its Vietnamese affiliate following CII B&R's issuance of new shares to existing and new investors. Separately, MPTC reported that construction of the Cavite segment of the Cavite-Laguna Expressway (CALAX) reached 84.67% completion and remains on track for July delivery. MPTC operates across the Philippines, Indonesia (92.8% stake in PT Nusantara Infrastructure), and Vietnam.

Analysis: The PHP 193M Vietnam stake preservation investment is a defensive but strategically sound capital allocation — ensuring MPTC does not suffer dilution in a growing ASEAN toll road market. Vietnam's transport infrastructure needs remain vast, and CII B&R's equity issuance to new investors suggests the asset is attracting fresh institutional interest. The CALAX July completion milestone is a meaningful near-term catalyst for MPTC's domestic Philippine toll revenues. GTCAP at PHP 489 was the strongest performer in the Holding Firms sector on May 25, with foreign funds buying PHP 47.35M — the fourth-largest foreign buying transaction of the session.

● **Stance: ACCUMULATE | GTCAP — MPTC infrastructure catalyst; CALAX July completion; strongest H-Firm session performer**

[SECTOR / SEVN / ACEN] IEA: EVs May Hit 45% of PHL Car Sales by 2035; 7-Eleven Switches 1,450 Stores to 100% Renewables via ACEN RES

The International Energy Agency's Global EV Outlook 2026 projects that electric vehicles could account for 45% of Philippine car sales by 2035 under its Stated Policies Scenario, up from an estimated 10% market share in 2025. The IEA noted continued reliance on import duty and excise tax exemptions as a near-term adoption driver, while Southeast Asia as a whole saw EV sales more than double last year. In the Philippines, March 2026 automotive sales totalled 36,104 units — a 10.4% year-on-year decline — with electrified vehicle sales surging to 6,148 units (17% of total monthly sales), confirming the EV trajectory. Separately, Philippine Seven Corporation (SEVN), operator of the 7-Eleven convenience store chain, entered an electricity supply agreement with ACEN RES — the retail electricity arm of the Ayala Group's ACEN Corp. — to switch 1,450 stores across Metro Manila, Batangas, Pangasinan, Bulacan, Cavite, and Nueva Ecija to 100% renewable energy.

Analysis: The IEA's 45% by 2035 scenario is a long-duration structural catalyst that reshapes the investment thesis for charging infrastructure, energy storage, and grid management stocks. ACEN's retail electricity arm (ACEN RES) winning a 1,450-store 7-Eleven supply deal is a significant commercial win — it validates ACEN's competitive position in the corporate RE market and accelerates its revenue diversification beyond generation assets. SEVN at PHP 33.05 (DQR close) represents a consumer-defensive name gaining an energy cost management edge. ACEN at PHP 3.08 was foreign-sold on the session but the RE commercial win is a medium-term positive. Monitor ACEN for accumulation on weakness; SEVN is a compelling defensive hold.

● **Stance: ACCUMULATE | ACEN — RE commercial growth + IEA 2035 EV tailwind** ● **MONITOR | SEVN — 100% RE cost hedge across 1,450 stores**

[PLUS] DigiPlus/Casino Plus Secures PHP 1B PhilFirst Surety Bond for Player Protection

Casino Plus, the PAGCOR-licensed digital gaming platform operated under the DigiPlus Interactive Corp. (PLUS) ecosystem, reinforced its compliance framework by securing a PHP 1 billion surety bond through PhilFirst Insurance Corp. CEO Evan Spytma said the bond reflects the company's commitment to operating with financial discipline, transparency, and accountability amid increased regulatory scrutiny. The bond serves as a financial guarantee tied to obligations to regulators and players, complementing Casino Plus's KYC verification systems and responsible gaming measures. The disclosure comes as the Philippine gaming sector faces rising economic headwinds, with online operators emphasising player-protection credentials to differentiate in a more cautious consumer environment.

Analysis: The PHP 1B surety bond is a regulatory compliance milestone that reduces counterparty risk for Casino Plus players — a brand differentiation play in a competitive online gaming market. For PLUS as the listed entity, the bond signals proactive governance rather than a response to regulatory pressure. PLUS at PHP 12.08 (DQR close, down 5.48% on the session) was sold by foreign funds. The session weakness may present an entry opportunity for those with conviction in DigiPlus's gaming revenue trajectory and its expanding compliance infrastructure. Monitor with a short-term negative bias until foreign flow stabilises.

● **Stance: MONITOR | PLUS — Surety bond is governance positive; session weakness creates potential entry; await foreign flow stabilisation**
