THE CALL — Quick Read & Actionable

Second up-day, broader tape. The PSEi advanced +0.93% (+56.46) to 6,125.72, its second straight gain, with breadth finally positive (98 advances / 87 declines). Mining & Oil (+2.45%) led, followed by Services (+1.16%), Financials (+0.93%), Holding Firms (+0.82%) and Property (+0.79%); Industrial (-0.11%) was the lone laggard. Value traded was ₱5.52B (DQR grand total; the ₱5.37B in circulation is main-board only).

The yield warning. The PHL 10Y jumped +14.1 bps to 7.116% — decisively above the 7% line that anchors our bank/REIT caution — even as the banks themselves rallied (BPI +2.5%, BDO +2.8%). Equity strength against a rising long end is an uneasy pairing; we would not chase the rate-sensitives here.

Flows: leaders vs. heavies. Net foreign selling widened to -₱199.8M (from -₱79.6M). ICT led inflows a third straight day (+₱137.6M), joined by BPI (+₱49.1M), AC (+₱34.4M), RCR (+₱29.8M) and AP (+₱27.5M); the exits stayed concentrated in SM (-₱96.6M), SGP (-₱60.8M), MYNLD (-₱53.4M), TEL (-₱47.9M) and AREIT (-₱45.5M).

Macro tape. The Dow rallied +1.1% to a record 52,900.07 into the July 4 holiday while the Nasdaq slipped -0.8% on semi profit-taking after a softer jobs report; gold rallied ~2% with US-Iran talks unresolved. In Asia, the Nikkei fell -2.5% on an AI/chip sell-off and the Kospi slumped -7.6% per the desk read. At home, the Philippines is entering World Bank upper-middle-income status — a credit-profile upgrade that also means the gradual loss of concessional financing.

Actionable ideas

- **ACCUMULATE ON DIPS ICT (₱913.00)** — three-day foreign-flow leader (+₱137.6M today); the dollar-earner rotation is intact.
- **ACCUMULATE AC (₱450.00)** — +7.6% on +₱34.4M inflow; ACMobility's BYD distribution rides surging China EV exports.
- **ACCUMULATE JFC (₱148.80)** — momentum extended (+5.9%); local demand absorbing -₱22.1M of foreign profit-taking.
- **MONITOR Banks (BDO/BPI/MBT)** — the 10Y above 7% (7.116%) is our standing caution trigger — enjoy the bounce, don't chase it.
- **MONITOR SM / SGP / MYNLD (outflow heavies)** — concentrated exits (-₱96.6M / -₱60.8M / -₱53.4M); wait for the selling to exhaust.

CORPORATE NEWS, ANALYSIS & INSIGHT

ICT ₱913.00

ICT extends its run: third straight session as the foreign-flow leader

International Container Terminal Services climbed to ₱913.00, again topping both turnover (₱1,277.4M) and net foreign buying (**+₱137.6M**) — its third consecutive session as the tape's flow leader, taking the three-day inflow to roughly ₱554M. The dollar-earner rotation remains the cleanest expression of a market wrestling with a peso near ₱61.65 and a local 10Y above 7%: offshore funds keep funding ICT purchases by trimming the peso-earning index heavyweights.

DA View — Stance: ACCUMULATE ON DIPS — the flow anchor of this tape; add on 3–5% pullbacks rather than chasing a three-day run.

AC ₱450.00

Ayala Corp jumps 7.6% as ACMobility's BYD franchise rides the China EV export surge

Ayala Corp surged to ₱450.00 (intraday ₱452.80) with **+₱34.4M of net foreign buying** and ₱284.8M of turnover — the day's fourth heaviest. The move coincides with strong China EV newsflow: BYD gained as much as 8.4% in Hong Kong after delivering 557,090 units in the June quarter, and AC's **ACMobility** is the official master distributor of BYD passenger vehicles in the Philippines — a direct, scalable link to EV adoption layered on top of the group's bank, property and telco stakes.

DA View — Stance: ACCUMULATE — conglomerate discount plus a genuine EV growth vector; the +7.6% pop argues for staged entries.

GLO ₱1,880.00

Mynt's \$11B IPO math: rich multiple, mostly secondary — a caution flag for GLO

A closer read of the GCash-parent **Mynt** IPO tempers the value-unlock excitement. At ₱10.00 per share the deal values Mynt at roughly **39x trailing P/E** (on 2025 net income of ₱17.2B) — an aggressive tech multiple that leans heavily on sustained high-margin growth. Structurally, the offer is dominated by secondary sell-downs: existing institutional holders (such as Warburg Pincus) and executives are paring stakes, with only about **30% of proceeds flowing into Mynt's primary operations**. GLO eased to ₱1,880.00 with -₱17.5M of foreign selling.

DA View — Stance: MONITOR — the listing remains a catalyst, but demanding pricing plus a secondary-heavy structure caps how much value actually accrues to GLO; accumulate only on consolidation toward ₱1,800.

BPI ₱101.00

BPI touted to lead sector ROE; banks rally into a 7%+ 10-year yield

Bank of the Philippine Islands is being positioned to lead the sector in return on equity, and the market voted with it: BPI rose +2.5% to ₱101.00 on **+₱49.1M of foreign buying** — the largest bank inflow of the day — while BDO added +2.8% (though still bleeding -₱34.1M). The complication is the rates tape: the PHL 10Y jumped +14.1 bps to 7.116%, breaching the 7% threshold that anchors our sector caution. A bank rally against a rising long end and a Fitch "deteriorating" outlook is a rally to respect, not chase.

DA View — Stance: MONITOR — BPI is the quality pick within the complex, but the yield trigger keeps the sector call at MONITOR.

RCB ₱23.60

Moody's affirms RCBC at Baa3 but cuts outlook to negative

Moody's Ratings affirmed Rizal Commercial Banking Corp's Baa3 long-term issuer rating — the last rung of investment grade — but revised the outlook to **negative**, echoing broader system-level pressure consistent with Fitch's "deteriorating" sector view and the 10Y's push above 7%. RCB shares are thinly traded (₱49.4K turnover) so the tape signal is limited, but the ratings direction reinforces the desk's caution on the mid-tier banks specifically.

DA View — Stance: MONITOR — investment grade intact but on watch; prefer the large-cap franchises (BPI/BDO/MBT) within an already-cautious sector stance.

MWC • VVT MWC ₱33.25

Water utilities: Manila Water breaks ground in Clark; Vivant starts Cebu desalination

Manila Water's unit and Clark Development Corp broke ground on a 10-MLD wastewater treatment plant in Clark — steady regulated-infrastructure expansion — while **Vivant (VVT)** began supplying desalinated water to a Cebu utility, a milestone for private water-security investment. The tape was less kind: MWC fell -2.8% to ₱33.25 with -₱6.4M of foreign selling and now screens RSI-oversold, echoing the supply-risk discount applied to Maynilad (MYNLD -₱53.4M outflow) as El Niño trims Angat allocations.

DA View — Stance: MONITOR on MWC/MYNLD — project momentum is real, but El Niño volume risk and heavy outflows argue for patience; VVT is illiquid (no trades printed).

Corporate briefs

Converge (CNVRG, ₱9.90) partnered with IBPAP to boost AI readiness in the IT-BPM sector — strategically sound, though the stock bled -₱23.1M of foreign selling (MONITOR). **San Miguel (SMC, ₱67.60)** secured ERC approval for a ₱1.7B transmission project (MONITOR). **LT Group (LTG, ₱14.64)** completed its renewable-energy shift with First Gen (FGEN +₱2.0M inflow) — a portfolio-quality positive (MONITOR). **SM group** collected 24 governance and investor-relations recognitions, supportive optics against SM's heavy outflows (MONITOR). **Century Pacific (CNPF, ₱30.40)** said its GenSan plant is nearing full operations, extending the capex-discipline story; +₱14.5M inflow (ACCUMULATE). **Aboitiz (AEV)** launched a golf range at Lima Estate — minor estate-monetization news (MONITOR). The **PSE's negotiated-trades proposal** drew analyst support as filling a market-structure gap — constructive for block liquidity over time.

Global tape

Macro & international

Philippines. The country is officially entering World Bank upper-middle-income status (GNI per capita band \$4,466–\$13,845) — a credit-profile and investor-confidence upgrade whose flip side is the gradual loss of cheap concessional financing. The PHL 10Y's jump to 7.116% is the day's most consequential local print, pressuring bank, REIT and leveraged-property valuations even as the equity tape rallied. Metro Manila hotel operators are touting ESG as a driver of asset value and profitability. The country's top 50 brands gained 11% in value on resilient domestic demand.

International. The Dow rallied 594.83 points (+1.1%) to a record 52,900.07 in the final session before the July 4 holiday, while the Nasdaq slipped -0.8% on semiconductor profit-taking after a softer June jobs report; Tesla deliveries jumped +25%, far above estimates. Gold rallied ~2% and long-end US yields reversed lower with US–Iran negotiations unresolved. Asian stocks wavered after their best quarter since 2009 — the Nikkei dropped -2.5% as Tokyo Electron and Advantest led an AI/chip sell-off, and the Kospi slumped -7.6% per the desk read. JPMorgan flagged Strategy's holdings as a new risk vector for Bitcoin.
