FIRST NEWS

Pre-Market Research | July 22, 2026 | Session: July 21, 2026

THE CALL

PSEi tumbled -1.27% to 6,333.80 in a broad selloff led by **Services (-2.49%) and Financials (-1.10%)**, erasing prior-session gains as foreign investors flipped to **net selling of P312M** — the first outflow session this week. ICT retreated 2.7% to P999 with P56M net selling after consecutive buying sessions. Mining & Oil (+3.51%) and Industrials (+1.26%) were the lone bright spots, led by Aboitiz Power's 7.1% surge to P45.00 on PSE index-rule reforms that clear the path for its re-inclusion. Brent crude broke \$91 as U.S.-Iran strikes continued into the tenth night. PHL 10Y pushed to 7.422%, the steepest level this month, pressuring rate-sensitive financials and property.

QUICK HIGHLIGHTS

	PSEi -1.27% to 6,334 — Services -2.49%, Financials -1.10%; decliners led 107/91
	NET FOREIGN SELLING P312M — first outflow this week; ICT flips to -P56M after +P549M prior session
	AP +7.1% to P45 on PSE float-rule overhaul; min float cut to 10% for P250B+ cos (eff. Feb 2027)
	PAL adds 9 more Airbus A350-1000 jets on top of 20 Boeing 787-10 MOU — fleet modernization accelerates
	Brent \$91.01, Gold \$4,085 — US-Iran strikes enter 10th night; 3 US soldiers killed
	PHL 10Y 7.422%, US 10Y 4.628% — BSP hiked to 4.75%; bank lending growth seen slowing

INTERNATIONAL

Wall Street rebounded as chip stocks stabilized after a brutal selloff, though investors should expect elevated volatility. U.S. forces struck Iranian targets after President Trump vowed Tehran "will pay" for killing three U.S. soldiers, even as mediators proposed a new truce. Brent crude broke above \$91 and gold surged to \$4,085 on safe-haven demand. Southeast Asian foreign ministers expressed concern that the U.S.-Iran conflict could lead to significant economic strain and shipping disruptions. China and the Philippines clashed again in the South China Sea with the U.S. condemning China's actions. The Bank of Korea raised its benchmark rate by 25bps to 2.75%. Nikkei 225 surged 3.3% and KOSPI jumped 8.9% on tech-sector rebound. TWSE rallied 4.2% recovering semiconductor losses. President Marcos appointed Lt. Gen. Antonio Nafarrete as new AFP Chief of Staff.

ICT 999.00

ICT Retreats 2.7% to P999 as Foreign Flow Reverses to -P56M Selling

International Container Terminal saw its foreign-flow streak snap, recording P56.1 million in net selling after three consecutive buying sessions (P211M, P549M). The stock dropped 2.7% from P1,027 to P999 on massive P2.63 billion turnover, the highest single-name value on the PSE. Block sales totaled P223 million across three transactions at P1,031-P1,038, well above the closing price, suggesting institutional profit-taking at elevated levels.

The flow reversal is consistent with tactical profit-taking after ICT's rapid run from P998 to P1,027. The stock remains the PSEi's most liquid name and premier dollar-earner hedge. Pullbacks toward P980-P990 may present re-entry opportunities for long-term holders.

AP 45.00

Aboitiz Power Surges 7.1% on PSE Index Rule Overhaul

Aboitiz Power was the session's standout gainer, surging 7.1% to P45.00 on 3.17 million shares with P21.5M net foreign buying. The rally was triggered by the PSE's announcement that it will lower the minimum public float requirement to 10% for companies valued at P250 billion or more, effective February 2027. AP was removed from the PSEi in 2023 when its float dropped to 17.48% (below the then-20% minimum). As a massive mega-cap well above the P120B threshold, the new 15% float cushion positions AP as the clearest beneficiary of the rule change.

AP's re-inclusion in the PSEi would trigger mandatory index-fund buying, creating a structural demand catalyst. With its current float now meeting the new threshold, the February 2027 effective date gives AP six months of anticipatory positioning. Energy tailwinds from rising oil prices add a fundamental overlay.

BDO 123.30

BDO Falls 2.8% with P100M Foreign Selling; Banks Under Rate Pressure

BDO Unibank dropped 2.76% to P123.30, the second most active stock at P629M. Net foreign selling hit P99.8 million, the largest single-name outflow on the session. Block sales of P52M (408K shares at P127.17) suggest institutional distribution. The selling follows the BSP's rate hike to 4.75% and bank lending growth projected to slow.

The PHL 10Y at 7.422% and BSP hike to 4.75% create a challenging NIM environment. BDO's session drop reflects sector-wide de-rating of bank stocks. Support at P120; resistance at P127.

PAL 2.34

PAL Orders 9 More Airbus A350-1000 Jets; Fleet Modernization Accelerates

Philippine Airlines added 9 more Airbus A350-1000 widebody jets to its fleet modernization program, announced at the Farnborough International Airshow. This comes on top of the MOU for up to 20 Boeing 787-10 Dreamliners announced the day prior. PAL is now building one of Asia-Pacific's most comprehensive fleet renewal pipelines, combining the A350-1000 for ultra-long-haul routes with the 787-10 for medium/long-haul efficiency. PAL was officially invited to join the oneworld Alliance in 2026.

The dual-order strategy (Airbus + Boeing) demonstrates aggressive fleet expansion. The 2031-2034 delivery timeline limits near-term earnings impact but positions PAL for structural growth in Philippine long-haul demand.

 **MONITOR****PSE Index Reform****PSE Overhauls Index Rules, Updates 2011 Framework**

The Philippine Stock Exchange is implementing a major overhaul of its index eligibility rules, lowering the minimum public float requirement to 10% for companies valued at P250 billion or above, effective February 2027. This is the most significant change to the PSE's 2011 framework and directly benefits large-cap names with concentrated ownership structures. The PSE is also rolling out ETF reforms and other measures to redirect retail capital from online gambling and cryptocurrency toward market participation.

The rule change has immediate implications for PSEi reconstitution. AP is the clearest re-inclusion candidate. Other large-cap names with borderline float ratios should also be monitored for index eligibility changes.

 **STRUCTURAL REFORM**

MYNLD 20.00**Maynilad Sees P123M Foreign Selling Despite P200M Turnover**

Maynilad Water Services attracted P122.9 million in net foreign selling, the session's heaviest single-name outflow, despite P200 million in value traded. The stock closed flat at P20.00. The massive foreign outflow contrasts with the water sector's fundamentals and likely reflects rebalancing or profit-taking after prior sessions.

The P123M outflow is outsized relative to MYNLD's typical daily flow and warrants monitoring. MWC (Manila Water) saw the opposite — P34.5M buying — suggesting potential rotation within the water space.

 **MONITOR****MER** 595.00**Meralco Gains with P57M Foreign Buying; Energy Sector Leads**

Meralco rose 1.2% to P595.00 with P57 million in net foreign buying, the session's top foreign-bought name. The utility continues to attract defensive positioning as oil prices push Brent past \$91 and rate sensitivity weighs on growth names.

MER's consistent foreign buying (P45M Jul 17, P55M Jul 20, P57M Jul 21) reflects sustained institutional conviction. The energy sector's 3.51% gain underscores commodity tailwinds.

 **MONITOR****ALI** 16.94**ALI Records Third Consecutive Session of Heavy Foreign Selling (-P95M)**

Ayala Land dropped 0.1% to P16.94 with P95.1 million in net foreign selling, continuing a pattern of heavy outflows: -P113M (Jul 20), -P95M (Jul 21). The stock remains the fifth most active at P246M turnover. The persistent selling pressure is notable against the backdrop of the PSEi's correction.

Three sessions of cumulative P355M+ foreign selling signal a sustained institutional repositioning out of ALI. The property sector's -0.48% decline adds sector-level headwind. Wait for flow stabilization before considering re-entry.

 **AVOID NEAR-TERM****SM** 588.00**SM Investments Drops 1.7% with P7M Foreign Selling**

SM Investments fell 1.67% to P588.00 on P257M turnover, with P6.7M in net foreign selling. Block sales of P24M (40K shares at P598.01) occurred above the closing price. The holding-firm sector declined 0.82%.

SM's session weakness mirrors the broader selloff in holdings and consumer-facing conglomerates. The dividend yield story (est. 3.97%) provides a floor but the yield gap vs PHL 10Y at 7.42% remains a headwind.

 **MONITOR****AT** 11.58**Atlas Mining Extends Rally +12.6%; Mining & Oil Leads Market Again**

Atlas Mining continued its breakout, gaining 12.6% to P11.58 on P204M turnover, making it the seventh most active stock. The mining & oil sector surged 3.51%, the session's top-performing sector for the second consecutive day. However, net foreign selling was P5.9M, suggesting the rally is primarily local-driven.

AT's two-day run (+17.5%, +12.6%) reflects the 807% NI swing being priced in plus commodity tailwinds from the Middle East conflict. The stock is now high-beta and overbought on short-term technicals. Profit-taking risk is elevated.
