

Market Overview & Actionable Ideas

Investors are witnessing a sharp rotation out of highly valued mega-cap tech stocks and into more economically sensitive sectors globally. In the US, risk appetite remains in check ahead of critical inflation data and geopolitical tensions. Locally, the PSEi posted a solid rebound, though net foreign selling persists. Value hunters may find opportunities in deeply oversold property and retail names experiencing heavy capitulation.

I. Equities Market Watch

Note: PSEi and All Shares data updated based on June 8 and June 9 closing prices. MidCap and DivYield indices are not tracked in the provided daily quotation reports.

Index	June 9	June 10	% Chg

- **Share Buybacks:** FRUIT, SMPH, AGI, SMC, URC, ALI.

IV. International News

- **US Markets:** Tech and AI shares resumed their sell-off, dragging the broader market lower as investors rotated out of high-growth names. The S&P 500 nearly erased a 2.3% intraday drop as investors moved into economically sensitive sectors. U.S. inflation data kept risk appetite in check.
- **AI Landscape:** Google is now bankrolling the data centers behind Anthropic's Claude (Anthropic remains unlisted), highlighting how fierce AI rivals are simultaneously becoming major partners.
- **Geopolitics:** The US military launched "self-defense strikes" against targets in Iran at approximately 17:00 EST on June 9, 2026, following the downing of a U.S. Army AH-64 Apache helicopter by an Iranian strike in the Strait of Hormuz. President Donald Trump noted that peace talks are on track now that the clashes have ended.
- **Asian Markets:** South Korea's Kospi experienced heavy intraday volatility, dropping as much as 2.8% at one point as chip stocks deepened losses, reflecting weakened global risk appetite following the US strike on Iran.

V. Local & Corporate News

Macro & Economy

- **Labor Market:** The unemployment rate dropped to 4.7% in April 2026 (down from 5.0% in March), with employed individuals reaching 48.89 million. However, soaring global fuel costs have driven underemployment to a near 3-year high as Filipinos seek additional work to cover the rising cost of living.
- **Aviation:** Qatar Airways and Philippine Airlines will resume their Manila-Doha codeshare.
- **Bonds:** The Philippines sold 8-year bonds at a 7.580% yield and 3-year bonds at a 7.307% yield at auction.

Corporate Updates

- **ALI (Ayala Land):** Closed at Php 13.40 (-1.47%). Experienced heavy capitulation, driving the stock back into deeply oversold (multi-year low) territory. Global funds net sold Php 54.0M by early afternoon. The company has resumed share buybacks and plans to reopen the Mandarin Oriental Manila in December.
 - **Stance: WAIT FOR STABILIZATION * Rationale:** The stock has suffered heavy capitulation, driving it into deeply oversold, multi-year low territory. While the company's resumed share buybacks offer a safety net, it is prudent to wait for price action to stabilize before initiating re-entry.
- **ICT (ICTSI):** Closed at Php 878.0 (+2.33%). The only PSEi name with significant net foreign buying (Php 53.3M). Fundamental strength is intact. Support is at Php 840.
 - **Stance: CORE HOLD / BUY ON DIPS**
 - **Rationale:** ICT is showing fundamental resilience and is the only PSEi constituent absorbing significant net foreign buying (Php 53.3M). Accumulate on dips, keeping a close eye on the critical Php 840 support level.
- **JFC (Jollibee):** Closed at Php 132.60 (+0.99%). RSI exited the oversold level. The global listing of its international business is seen as a major potential catalyst, leaning toward a Hong Kong listing.
 - **Stance: ACCUMULATE**
 - **Rationale:** The stock's RSI is successfully exiting oversold territory. The impending global listing of its international business—potentially in Hong Kong—remains a massive catalyst for unlocking shareholder value.
- **JGS (JG Summit):** Cut CAPEX by 42% to Php 69.2 Billion to prioritize cash flow, balance sheet strength, and operational efficiency after exiting its loss-making petrochemical business.
- **SMC (San Miguel):** San Miguel Global Power Holdings Corp (SMCGL) issued US\$ Senior Perpetual Capital Securities (Reg S CAT1). Call dates are at Year 5 and any subsequent Distribution Payment Date.
- **BPI (Bank of the Philippine Islands):** Closed at Php 91.25 (-0.76%). Its new VinFast EV financing partnership adds growth optionality.
 - **Stance: ACCUMULATE**
 - **Rationale:** BPI continues to see modest net foreign buying despite broad market sell-offs. The new VinFast EV financing partnership adds excellent long-term growth optionality to its portfolio.
- **SMPH (SM Prime):** Closed at Php 17.88. Approaching 52-week low territory, but its experiential retail pivot and China/Fujian strategy are deemed strategically sound.
 - **Stance: MONITOR / ACCUMULATE ON WEAKNESS**
 - **Rationale:** Though currently lingering in 52-week low territory, management's pivot toward experiential retail and a refocused China/Fujian strategy are fundamentally sound. Active share buybacks provide downside protection.
- **ACEN (ACEN Corp):** Closed at Php 3.34 (+2.45%). Recently launched an EV+RE bundled package.
- **MER (Meralco):** Closed at Php 570.50 (+1.15%). A relative outperformer; long-term RE initiatives remain positive amid Middle East volatility.

- **Stance: ACCUMULATE**
 - **Rationale:** MER remains a relative outperformer during broader market down sessions. Strong domestic power demand and long-term renewable energy (RE) initiatives position it favorably amid ongoing Middle East volatility.
- **AREIT (AREIT Inc):** Closed at Php 38.50. Target stands at Php 48.06 (+24.8%). Triggers are active as the PHL 10-year yield eased.
 - **Stance: ACCUMULATE**
 - **Rationale:** Favorable macroeconomic conditions are aligning for REITs, with the PHL 10-year yield easing. All three company growth triggers are active, pointing to a target price of Php 48.06 (a +24.8% upside).
- **PLUS (DigiPlus):** Closed at Php 10.16 (+2.01%), defending its Php 10 support level despite intraday swings.
 - **Stance: MONITOR**
 - **Rationale:** The stock is experiencing significant intraday swings. Watch closely to see if it can successfully defend its critical Php 10.00 support level before committing capital.
- **MEG (Megaworld):** Closed at Php 2.0. Fundamental positives noted with 24 office towers fully leased (including JPMorgan, Wells Fargo, Coca-Cola).
 - **Stance: MONITOR**
 - **Rationale:** Core fundamentals are incredibly strong, highlighted by 24 office towers now fully leased to blue-chip global occupiers like JPMorgan, Wells Fargo, and Coca-Cola. Wait for broader macro headwinds to clear for a true re-rating.
- **SGP (Synergy Grid):** Closed at Php 31.95 (+1.43%). Showing strong outperformance with an RSI of 76.95.
 - **Stance: MONITOR**
 - **Rationale:** SGP is showing strong outperformance against the broader market. However, with a high RSI of 76.95, it is in overbought territory, making it vulnerable to short-term profit-taking.
