High-Conviction Corporate Stance Cards:

Ayala Land, Inc. (ALI) · Close: ₱15.00 (-1.19%) | STANCE: STRONG ACCUMULATE

- **The Catalyst:** FTSE rebalancing dragged ALI to an intraday low of ₱14.70 before closing at exactly ₱15.00, sitting squarely on parent Ayala Corp's open-market purchase floor of ₱15.006 (where AC acquired 261,500 shares). Total turnover reached ₱371.05M on 24.75M shares traded. Unit deliveries at Gardencourt Residences in Taguig ensure cash collections.
- **Action Plan:** Accumulate aggressively at or below ₱15.00. Sponsor-backed valuation provides exceptional downside protection.

Manila Electric Company (MER) · Close: ₱480.00 (-0.70%) | STANCE: ACCUMULATE (< ₱480)

- **The Catalyst:** Foreign institutions actively accumulated +₱105.24M in MER despite broad market selling, on total turnover of ₱450.25M. The removal of

the 12% VAT on allowable system-loss charges took effect, lowering end-consumer tariff rates and defending power sales volume.

- Action Plan: Maintain limit-buy orders between ₱470.00 and ₱480.00.

Semirara Mining & Power Corp. (SCC) · Close: ₱17.96 (unchanged) | STANCE: CAUTION

- **The Catalyst:** Following confirmation that the Department of Energy will proceed with a competitive coal auction, raises structural questions over SMPC's long-term margin premium.
- **Action Plan:** Stand aside. Do not attempt to bottom-fish until regulatory terms and coal concession allocations are fully disclosed.

Bank of the Philippine Islands (BPI) · Close: ₱100.10 (-1.38%) | STANCE: ACCUMULATE NEAR ₱100

- **The Catalyst:** BPI absorbed passive selling of -₱40.73M but successfully held above the key ₱100.00 psychological support level (low: ₱99.05). Its industry-leading CASA deposit franchise insulates net interest margins in a 7.5% sovereign rate environment.
- Action Plan: Accumulate at ₱100.00–₱100.50.

International Container Terminal Services (ICT) · Close: ₱905.00 (-4.74%) | STANCE: WAIT FOR BASE

SM Investments (SM) & SM Prime (SMPH) | STANCE: MONITOR FOR REVERSAL (OVERSOLD RSI < 30)

- The Catalyst: Bearing the brunt of FTSE index weighting cuts. Foreign funds liquidated -₱870.40M in SM (close ₱503.00, -3.27% on ₱1.17B turnover) and -₱267.01M in SMPH (close ₱16.54, -3.84% on ₱464.89M turnover).
- Action Plan: With RSI falling below 30 into extreme oversold territory, watch for mechanical mean-reversion bounces now that rebalancing execution is complete.
- **The Catalyst:** ICT was the primary index drag, dropping -₱45.00 to close at its session low of ₱905.00 on ₱2.38B in turnover (2.62M shares), driven by -₱291.68M in net foreign passive liquidation.

- Action Plan: Exercise patience. The global concession thesis is solid, but allow rebalancing volume to dry up near the ₱895–₱905 support band before initiating fresh swing trades.

Module V: SmartWatch Corporate & Regulatory Disclosures

- **Regulatory Governance — Ombudsman Inquiries into PrimeWater JVs:**
Preliminary graft complaints filed vs Villar family members regarding local water district contracts created sector sentiment drag for Villar-linked names (VLL, HOME).
- **Corporate Simplification — Filinvest Land (FLI):** FLI approved the dissolution of three non-core subsidiaries to reduce administrative overhead and streamline balance sheet operations.
- **Primary Market Pipeline — Cebu Shipping IPO:** A regional shipping operator submitted registration papers for an IPO to fund expansion of its inter-island freight and passenger vessel network.
- **Aviation Sector Momentum:** StarLux Airlines projected triple-digit passenger expansion in the Philippines for 2026, while AirAsia's Tony Fernandes affirmed robust regional leisure demand despite aviation fuel costs.
- **Exchange Suspensions Registry:** Confirmed suspended trading status for DHI, HOME, VLL, ALLDY, VREIT, STR, ANI, CYBR, and PNX as of September 18, 2026.

Module VI: The Intelligent Investor: Generational Wealth & Market Wisdom

FTSE Rebalance Liquidity Washes: Exploiting Forced Selling Below 5,900

The drop to 5,855.91 on ₱16.23B in gross rebalancing turnover illustrates an institutional liquidity wash. Passive global funds do not sell because a business is broken; they sell mechanically because benchmark weighting rules require them to liquidate quotas of Philippine equities at the closing cross.

The Three Core Disciplines:

1. Warren Buffett on Price vs. Value:

'Price is what you pay; value is what you get.'

Forced passive selling creates rare pricing dislocations. When Ayala Land trades down to ₱15.00 (hitting an intraday low of ₱14.70), it trades right at the parent company's buy floor of ₱15.006. When BPI touches ₱99.05 and closes at ₱100.10, the market is offering established moats at distressed valuations driven strictly by index math.

2. Charlie Munger on Rebalance Arbitrage:

'A great business at a fair price is superior to a fair business at a great price.'

The intelligent investor separates operational earning power from quarterly index calculations. ICT's terminal concessions and USD cash flows are unchanged by a FTSE weighting change. Use forced liquidations to acquire premier assets.

3. Ray Dalio on Late-Cycle Deleveraging:

In a monetary tightening regime with sovereign yields at 7.5% and central banks hiking, capital is preserved in entities with high ROE, low refinancing exposure, and essential infrastructure/land assets.

Multi-Horizon Allocation Blueprint:

• 1. Short-Term Tactical (1 - 30 Days):

- Posture: Rebalancing mean-reversion watch.
- Playbook: Rebalance overhang cleared at Friday's close. Look for relief bounces in deeply oversold heavyweights (SM at RSI 24, SMPH,

- ICT at RSI 26). Avoid chasing extended mining names (APX, AT at RSI > 70).
- 2. Medium-Term Position (1 - 12 Months):
 - Posture: Strategic accumulation of corporate catalysts.
 - Playbook: Accumulate asset catalysts and deleveraging stories: ALI (₱15.00), MER (₱480.00), TEL (₱1,145.00), and RCR (₱6.92).
 - 3. Generational Wealth Compounders (5 - 20+ Years):
 - Posture: Systematic Dollar-Cost Averaging (DCA) below 5,900 PSEi.
 - Playbook: Exploit passive liquidations (-₱1.46B) to lock in multi-year low valuation multiples: BPI (₱100.10), ICT (₱905.00), and AEV (₱36.95).
