ACTIONABLE HIGHLIGHTS · THE CALL

PSEi closed **+0.37% at 6,105.99 (+22.31)** — but the green is deceptive: breadth was **negative (89 advancers vs. 102 decliners)**, five of six sectors closed red, and the index was carried entirely by **Mining & Oil (+2.40%, +505 pts)** and Services (ICT). Net foreign was **+P164.5M** — but that is entirely ICT (+P418.9M); ex-ICT, foreigners were net sellers of ~P254M.

ACCUMULATE — METALS RE-RATING & FLOW LEADERS

- **AT (Atlas Mining)** — Story of the day: +10.58% to P23.05 on a P4.6B H1 profit turnaround and the Sy/Consunji-backed Dominion 20.43% stake / Tampakan build-out. Foreign +P53.1M, P193M turnover. Desk target P50 — accumulate on pullbacks, don't chase the spike.
- **AEV** — Foreign flow flipped decisively to buying +P33.3M (from -P6.3M last week) on the AIC airport-network story; P85.9M turnover. Upgrade — flow confirms the value case.
- **AP / APX** — AP +P23.1M foreign as energy security bids up power; APX +P35.9M foreign accumulation even on a price dip. IMI ripped +10.9% (AI-hardware/EMS).

MONITOR — WHIPSAW & GOVERNANCE

- **ALI** — Flow flipped again — -P38.3M foreign, close -2.2% to P14.94, reversing last week's buying. Fundamentals intact but foreign participation is unreliable; wait for stabilisation.
- **ABS-CBN (ABS)** — P6B equity raise via subscription; I&C Holdings set to take ~27%. Balance-sheet repair + new strategic backer vs. dilution and Lopez-group flux — special situation.
- **ICT** — Genuine leader, but a P418.9M single-day foreign buy on P930M turnover (~21% of market value) looks index/passive-driven — accumulate, but don't chase the print.

CAUTION — OIL, RATES & DISTRIBUTION

- **Banks (BDO / MBT)** — Financials worst sector -0.78%. BDO -P52.5M foreign; PHL 10-yr up to 7.351% (govt sold 2033s at 7.352%). Oil-driven inflation + heavy supply keep the >7% trigger live.
- **CNVRG** — Heaviest ex-ICT foreign selling -P39.8M; ESCAP flags PHL's highest mobile-broadband cost among peers. Sustained distribution — avoid.
- **Macro** — Brent near \$100 on Middle-East tension is a direct hit to a fuel-importer: capital-flight risk, peso at P62.6. FX reserves a cushion at \$104.8B (6.8 mos cover).

PHILIPPINES STRATEGY

Macro. The dominant risk is imported: Brent near \$100 on Middle-East tension is a direct hit to a fuel-importer, pressuring inflation, the peso (₱62.635) and portfolio flows. Government sold ₱20.701B of 6.625% 2033 bonds at a 7.352% yield, and the PHL 10-yr pushed to 7.351% — the >7% bank-caution trigger is firmly live and rising. A partial cushion: BSP gross reserves rose to \$104.81B in August (from \$103.32B), ~6.8 months of import cover and 3.7x short-term external debt.

Where we lean in. This tape rewards metals and energy-security over index beta. We lean into the mining re-rating — AT on the ₱4.6B profit turnaround and the Dominion/Tampakan build-out (scaling in on pullbacks after a +10.6% day), APX on continued foreign accumulation, and copper strength. Energy names (AP) work as an oil hedge. We treat ICT as a genuine leader while flagging that its ₱418.9M foreign print looks index-driven. We fade telcos under distribution (CNVRG) and keep banks cautious under the rising yield. ALI stays on Monitor until foreign flow settles.

Five of six sectors closed red; only Services (+1.81%, ICT-led) and Mining & Oil (+2.40%, +505 pts) advanced — a narrow, sector-driven green.

FOREIGN FUND FLOW

Headline net foreign **BUYING +P164.54M** is a single-name artifact: **ICT alone drew +P418.9M**. Strip it out and foreigners were net sellers of ~P254M, led by CNVRG, ALI and NIKL. Metals (AT, APX) and infra/power (AEV, AP) were the genuine bright spots.

CORPORATE STANCE CARDS

AT · Atlas Mining surges +10.6% on profit turnaround and the Dominion / Tampakan story

Atlas Consolidated Mining jumped +10.58% to ₱23.05 — the day's biggest large-cap move — after reporting a ₱4.6B net profit for H1 2026, a decisive turnaround. The re-rating is anchored by ownership change: Sy- and Consunji-backed Dominion Holdings (DHI) has taken a 20.43% stake in Atlas, the country's largest listed copper producer, with SM Investments' ~34% stake and the giant Tampakan copper-gold project (South Cotabato) slated to follow via a DHI merger that shareholders vote on 14 Sep. BusinessWorld reports DHI expects Q4 completion of the Tampakan-linked merger. Foreign investors bought +₱53.1M; turnover ₱193M.

Analysis. The fundamental case has genuinely re-rated — profitability restored, a deep-pocketed new control group, copper firm (+0.94%), and optionality on Tampakan (SE Asia's largest undeveloped copper-gold deposit). We keep a ₱50 reference target, but after a parabolic +10.6% session we accumulate on pullbacks rather than chase the print; watch the 14 Sep DHI vote and merger terms.

Stance: ACCUMULATE ON PULLBACKS · TARGET ₱50

ICT · Dominant flow name — but the print looks index-driven

ICT closed ₱957 (up) as the single most important name of the session: ₱930.0M in regular-market turnover — roughly 21% of the entire market's ₱4.39B — and net foreign buying of +₱418.9M that by itself flipped the whole market to net-buyer status. The Manzanillo (Mexico) capacity-expansion catalyst remains supportive of the dollar-earner franchise.

Analysis. A foreign buy of this magnitude concentrated in one name, on this turnover, is more consistent with an index/passive rebalance or a single strategic buyer than with broad organic demand. We stay constructive on the franchise and accumulate on dips, but we would not chase the print at these levels; the flow could normalise quickly once the driver clears.

Stance: ACCUMULATE ON DIPS (DON'T CHASE)

AEV · Foreign flow flips to strong buying on the airport story

Aboitiz Equity Ventures saw foreign flow reverse hard to net buying of +₱33.3M (from -₱6.3M last week) on ₱85.9M turnover, even as the price eased to ₱36.75. The move follows Aboitiz InfraCapital's push for additional Asian routes and airline partners across its Mactan-Cebu, Laguindingan and Bohol-Panglao network.

Analysis. This is the flow confirmation we were waiting for on the accumulate-on-weakness thesis. The infrastructure/airport build-out is a multi-year value driver and foreign investors are now paying up into weakness; we upgrade from Monitor to Accumulate, using dips toward recent support to add.

Stance: ACCUMULATE

AP · Aboitiz Power bid up as an energy-security hedge

Aboitiz Power closed ₱45.40 (up) with foreign buying of +₱23.1M as surging oil and Middle-East tension put a premium on domestic power generators. AP pairs a diversified thermal-and-renewables fleet with the group's infrastructure story.

Analysis. With Brent near \$100 and inflation risk imported through fuel, we like AP as an oil-linked hedge with foreign flow behind it; the energy-security theme should persist while the geopolitical bid holds. Accumulate, sized alongside the metals leadership as a defensive counterweight.

Stance: ACCUMULATE

IMI · AI-hardware / EMS proxy rips +10.9%

Integrated Micro-Electronics surged +10.9% to ₱8.24 (high ₱8.64) on ₱58.7M turnover with foreign buying of +₱4.5M — the local AI-hardware / EMS proxy responding to the global electronics-manufacturing and AI-infrastructure build-out.

Analysis. The thesis is playing out and foreign flow is supportive, but a near-11% single-session move argues for discipline on entry. We keep the accumulate-on-dips stance and add on pullbacks rather than chase strength; the structural EMS/AI-hardware tailwind remains our reason to own it.

Stance: **ACCUMULATE ON DIPS**

ALI · Foreign flow whipsaws negative again

Ayala Land reversed last week's buying, closing -2.2% to ₱14.94 on ₱121.7M turnover with heavy foreign selling of -₱38.3M. The leasing-pivot fundamentals are intact, but foreign participation has flipped direction twice in a week.

Analysis. We are not chasing a name whose flow is this unstable. The deep-value/leasing thesis still holds on fundamentals and the AC parent-buyback provides a floor reference, but we move ALI back to Monitor and wait for two-sided foreign flow to settle before re-engaging the accumulate call.

Stance: **MONITOR**

ABS-CBN (ABS) · ₱6B equity raise and a new strategic backer

ABS-CBN is raising ₱6B in fresh equity via share subscription — I&C Holdings ₱3.5B, a Crème Investment / Mantes / Presta group ₱2.2B, and Lopez Inc. ₱300M — with I&C (IC) reportedly set to take a ~27% stake (per BusinessWorld). ABS closed ₱3.65; parent LPZ ₱5.50.

Analysis. This is a balance-sheet-repair and control-shift story rather than an earnings call: fresh capital and a new strategic anchor cut against dilution and continued Lopez-group flux. We treat ABS as a special situation / governance watch — sizing small and tracking the subscription terms and the emerging shareholder map before taking a directional view.

Stance: **SPECIAL SITUATION · GOVERNANCE WATCH**

Banks & CNVRG · Rising yields and distribution keep the caution flag up

Financials were the weakest sector (-0.78%). BDO shed -₱52.5M in foreign flow (closing ₱120) and MBT -₱11.9M, while the PHL 10-yr rose to 7.351% and the government sold 2033 bonds at 7.352% — the >7% bank-caution trigger is worsening on oil-driven inflation and heavy supply. Separately, Converge (CNVRG) drew the heaviest ex-ICT foreign selling at -₱39.8M (close ₱9.10), with an ESCAP report flagging the Philippines' highest mobile-broadband cost among emerging peers.

Analysis. We keep banks on a cautious Monitor while the 10-yr climbs; rising funding costs and bond-book marks cap re-rating, and BPI's optically positive flow is distorted by a ₱149.4M block. CNVRG stays Avoid on sustained distribution plus a pricing/regulatory overhang.

Stance: **MONITOR (BANKS) · AVOID (CNVRG)**
