Session snapshot PSEi 6,261.80 ▼ -35.50 (-0.56%) • Value ₱4.59B • Breadth 113 up / 85 down / 58 flat • Foreign net SELLING ₱222.4M

AT A GLANCE — ACTIONABLE HIGHLIGHTS

- ▶ PSEi slipped -0.56% to 6,261.80, giving back Friday's marginal gain as the index traded a 6,257.48-6,315.07 range on thinning momentum. Breadth stayed narrowly positive (113/85) but turnover eased to ₱4.59B. Mining & Oil (+3.40%) and Industrial (+1.20%) led; Holding Firms (-1.25%) and Services (-1.48%) lagged.
- ▶ Foreigners were net SELLERS of ₱222.4M — a second straight session of outflows — concentrated in SMPH (-₱120.1M), ICT (-₱41.0M), ALI (-₱38.4M), CNVRG (-₱35.0M) and SM (-₱34.5M).
- ▶ FGEN cratered -11.4% to ₱27.20, its sharpest slide in recent memory, after parent First Philippine Holdings (FPH) rejected KKR's ₱35/share take-private tender as undervaluing the company — removing the near-term catalyst the spread-to-tender trade depended on.
- ▶ BPI drew the day's largest single foreign inflow (+₱68.1M) even as Financials still slipped as BDO and the broader bank complex gave back gains; PHL 10-year held at 7.335%, still above our 7% caution line.
- ▶ Earnings tape was heavy: Megaworld 1H net income +5% to ₱12.7B on 20% pre-sales growth; Ayala Land 1H net income -19% to ₱11.5B; Jollibee +2.90% to ₱159.50 as repricing restored margins; Bloomberry cut its Q2 net loss ~75% to ₱345.3M; ABS-CBN's Q2 loss more than tripled on cable/broadband declines.
- ▶ A ~₱621.7M SM Investments block cross (1.04M sh at ₱600.00) dominated the day's ₱679.2M block sale tape, alongside PGOLD (₱26.9M) and BPI (₱30.6M) crosses.
- ▶ Macro backdrop: metro Manila and nearby provinces shifted to alternative work arrangements from Monday noon on heavy southwest-monsoon rains; June OFW remittances rose less than expected; the peso weakened for a third straight session toward a two-week low.

THE CALL

A risk-off session that reversed Friday's modest bounce. The index fell on thinner, name-specific selling, and the sector rotation was unusually sharp — gold-linked miners and industrials rallied while banks, holdcos and services gave ground. We read this as consolidation with a negative skew rather than the start of a durable leg down, but the FGEN news changes the shape of the market's most actionable event-driven trade overnight. With First Philippine Holdings publicly rejecting KKR's ₱35/share proposal as undervaluing First Gen, the tender that anchored our spread-to-tender thesis on FGEN no longer has a clear path forward; the stock's 11.4% drop to ₱27.20 reflects the market pricing out that catalyst, and we downgrade FGEN to MONITOR pending clarity on whether KKR returns with an improved offer or the parties walk away. Elsewhere, the bank complex continues to chop sideways: BPI pulled in the day's largest foreign inflow (+₱68.1M) yet Financials still lagged, reinforcing our stance to keep Banks on Monitor while the PHL 10-year sits above our 7% caution line at 7.335%. On the earnings tape, Megaworld's 20% pre-sales growth and steady net-income gain stand out favorably against Ayala Land's 19% profit decline — a reminder that the property recovery remains uneven across the sector — while Jollibee's margin recovery on repricing and Bloomberry's sharply narrower loss are the clearer earnings-quality wins of the day. Firmer gold (COMEX still above ₱4,440/oz) and a well-bid mining tape (+3.40%) keep our standing Accumulate-on-dips stance intact on OGP and the sector's larger miners, even as the broader tape stays cautious.

GLOBAL & REGIONAL MARKETS

Prev = Aug 14 (Fri) close · Latest = Aug 17 (Mon) close. Wall Street fell on a surprise drop in U.S. retail sales, firmer energy prices and profit-taking in high-multiple tech/semis as hopes faded for a deal to end the six-month Middle East war after President Trump said he would not extend the Iran truce; regional Asian trade was mixed to flat, with Greater China outperforming on policy-support hopes and Japan/Korea more muted amid soft domestic data.

COMMODITIES

Gold pushed back above the psychologically important \$4,400/oz level and held near record territory on broad safe-haven demand after a quiet prior quarter; silver firmed in sympathy. Brent crude cleared \$91/bbl and WTI topped \$84.90/bbl as President Trump's refusal to extend the Iran truce revived supply fears; grains extended their advance (corn, wheat) while cocoa jumped again.

PHILIPPINES

- The government shifted offices in Metro Manila and nearby provinces to alternative work arrangements from Monday noon as heavy rains from the southwest monsoon disrupted the capital region.
- The PSEi closed down 0.56% at 6,261.80; breadth stayed narrowly positive with 113 advances against 85 declines and 58 unchanged.
- Overseas Filipino cash remittances for June rose less than economists had expected.
- The Treasury sold ₱9.8B of 364-day bills at 5.613%, ₱21B of 182-day bills at 5.442%, and ₱24B of 91-day bills at 5.008%.
- The peso weakened for a third straight session, trading near a two-week low around ₱61.55/US\$; the BSP indicated it will not spend down all of its reserves to defend the currency.
- Policy chatter continues to point toward the BSP tempering further rate hikes and leaning on fiscal spending to support growth as momentum slows.

PHILIPPINES STRATEGY

Selective de-risking, not capitulation. The index gave back 0.56% on lighter ₱4.59B turnover, with leadership rotating hard into Mining & Oil (+3.40%) and Industrial (+1.20%) on firmer gold and energy prices, while Holding Firms (-1.25%) and Services (-1.48%) led the laggards. Foreigners were net sellers for a second straight session (-₱222.4M), concentrated in index heavyweights SMPH, ICT, ALI, CNVRG and SM — a pattern consistent with profit-taking into strength rather than a broad exit. We stay overweight quality earners and event-driven names, but we are removing FGEN from our top event-driven list following FPH's rejection of the KKR tender, and we keep rate-sensitive banks, REITs and property on Monitor until the PHL 10-year sustains a move below 7% (currently 7.335%). Firmer gold and a well-bid mining tape argue for keeping exposure to OGP and the larger miners on dips, while Megaworld's 20% pre-sales growth and Jollibee's margin recovery stand out as the session's cleaner earnings-quality stories.

Mining & Oil surged on firmer bullion and base-metal prices, led by Atlas Mining and Apex Mining; Industrial firmed on Meralco, Manila Water and the power complex. Holding Firms and Services lagged as Ayala Corp, Converge and the port/telco names absorbed heavier foreign selling. Note: Sectoral and Grand Total include Normal Market, Odd Lot, Block Sale and VWAP transactions.

CORPORATE UPDATES

FGEN

First Gen Corp.

P27.20**FGEN slides 11.4% as FPH rejects KKR's P35/share take-private tender**

First Gen fell to P27.20 (-11.4%) after First Philippine Holdings (FPH) publicly turned down KKR's proposal to buy additional shares in First Gen and launch a P35.00/share public tender offer, stating the bid undervalues the company. FGEN topped session turnover by value (P373.5M) as investors repriced the deal's completion odds sharply lower; the stock now trades roughly 22% below the rejected P35 offer level, versus a much narrower spread while the tender looked live. FPH's move follows the recent ERC signal that it will scrutinize power-sector ownership limits after San Miguel's Ramon Ang took a stake tied to the Lopez group — a second overhang now compounded by the outright rejection. *Source: BusinessWorld.*

Stance: MONITOR (downgraded from Event-Driven/Tender) — the near-term catalyst is gone; only revisit on a revised offer or fresh disclosure.

—

FPH turns down KKR bid for First Gen stake, cites undervaluation

First Philippine Holdings rejected KKR's proposal to buy a stake in First Gen and launch the P35/share public tender offer, stating the bid undervalues the company. The decision removes, for now, the clearest path to a First Gen voluntary delisting and leaves the stock trading on its underlying utility and renewables earnings rather than deal optionality. *Source: BusinessWorld, bworldonline.com/corporate/2026/08/18/770770.*

Stance: MONITOR — watch for a revised approach from KKR or alternative strategic interest.

MEG

Megaworld Corp.

P2.32**Megaworld's 1H net income rises 5% to P12.7B on 20% pre-sales growth**

Megaworld posted consolidated net income of P12.7B for 1H26, up 5% from P12.09B a year earlier, as residential margins exceeded expectations and real-estate pre-sales grew 20% year-on-year. Management flagged sustained buyer demand and momentum across its major township developments. The stock eased modestly on the session despite the constructive print, in line with the broader Property sector's mixed close.

Stance: ACCUMULATE — pre-sales growth and margin execution outpace peers; a rare property bright spot this earnings season.

ALI

Ayala Land, Inc.

P15.18**Ayala Land's 1H net income falls 19% to P11.5B**

Ayala Land posted 1H26 net income of P11.5B, a 19% decline from the same period last year, underscoring a softer residential and leasing environment relative to Megaworld's stronger print. The stock still drew the fourth-heaviest turnover of the day (P116.7M) and carried a P38.4M net foreign outflow. We continue to view ALI as deep value against its asset base, supported by continued Ayala Corp buyback activity, even as the earnings trend argues for patience.

Stance: ACCUMULATE (deep value) — weaker 1H print is a sector-wide headwind, not an ALI-specific issue; buyback support underpins the floor.

JFC

Jollibee Foods Corp.

P159.50**Jollibee rises 2.9% as strategic repricing restores profit margins**

Jollibee Foods closed up 2.90% at P159.50 as the market rewarded quarter-on-quarter margin improvement from targeted pricing initiatives. The stock drew the second-largest foreign inflow of the session (+P25.7M) and was among the day's most actively traded names by value (P136.8M).

Stance: ACCUMULATE — margin recovery is the clearest positive earnings-quality signal in today's consumer names.

ABS

ABS-CBN Corp.

P4.06

ABS-CBN's Q2 loss more than triples to ₱897M as cable, broadband revenue slide

Consolidated revenues fell to ₱6.88B (-17% y/y) on declining Cable TV and Broadband segments, driving a widened net loss of ₱1.83B for the first half despite a 5% cut in operating expenses to ₱8.46B. Cost discipline has not yet offset the pace of revenue erosion in the legacy segments. *Source: BusinessWorld.*

Stance: AVOID / MONITOR — structural revenue decline outpaces cost cuts; needs evidence of segment stabilization before revisiting.

BLOOM

Bloomberry Resorts Corp.

P2.32

Bloomberry cuts Q2 net loss ~75% to ₱345.3M

Bloomberry Resorts significantly narrowed its second-quarter consolidated net loss to approximately ₱345.3M, down roughly 75% from the ₱1.41B net loss posted in the same quarter last year — a meaningful operational recovery for the gaming operator even as the shares eased slightly on the session.

Stance: ACCUMULATE ON WEAKNESS — the loss-narrowing trend is the standout positive; near-term price action lags the fundamental improvement.

SMARTWATCH SUMMARY

- FGEN/FPH-KKR: the take-private tender is now in doubt after FPH's rejection; watch for a revised KKR offer or a formal deal withdrawal — either would be the next tradable catalyst.
- ERC ownership review: the Energy Regulatory Commission's look at power-sector ownership limits (following SMC's Ang taking a Lopez-group stake) remains a live regulatory overlay across the generation space.
- BSP policy signal: Governor Remolona's less-aggressive rate-hike lean stays the key macro item; a durable dovish shift paired with a sub-7% PHL 10-year would be the trigger to upgrade banks, REITs and property from Monitor.
- Peso watch: a third straight day of weakness toward a two-week low bears monitoring against the BSP's stated reluctance to fully deploy reserves in defense of the currency.
- Weather/logistics: continued southwest-monsoon rains and alternative work arrangements in Metro Manila are a near-term drag on retail footfall and logistics-linked names.
- Block tape: the ₱621.7M SM Investments cross was the standout block of the session — monitor for follow-through positioning in SM's index weight.
- Bond supply: the Treasury's long-end auction calendar remains a live gauge of demand with the 10-year sitting at 7.335%.

DIVIDEND YIELD (DIVY 20) TRACKER
