

DA MARKET SECURITIES, INC.

PSEi rebounds sharply — +1.95% to 5,912.69 on June 2 — snapping a multi-session slide as foreigners return to net buying (+PHP 628.7M / +USD 10.2M) for the first time since MSCI rebalancing disrupted flows. ICT surged to PHP 830 on record PHP 1.66B turnover, JFC recovered to PHP 134.90, and five of six PSE sectors finished in the green. Globally, the S&P 500 extended its 8-week winning streak and South Korea surpassed India as the world's 6th-largest equity market on AI chip exuberance. Crude oil jumped over 5% and Bitcoin sold off sharply. AREIT holds at PHP 38.50 — a confirmed ACCUMULATE at current levels as all three technical triggers remain intact.

GLOBAL MACRO

US Markets: The S&P 500 climbed to 7,609.78 (+0.39%) and the Dow Jones Industrial Average rose to 51,307.79 (+0.54%), extending what has become the longest unbroken weekly winning streak of 2026 — eight consecutive weeks of gains. The NASDAQ Composite also advanced to 27,093.90 (+0.45%). Investor sentiment was underpinned by resilient corporate earnings, moderating rate expectations, and continued capital rotation into equities on the back of easing US-China trade tensions.

South Korea AI Surge: South Korea unseated India as the world's 6th-largest stock market by market capitalization, with Korean equities surging approximately 86% year-to-date to reach a USD 5 trillion market cap, driven by an explosive global AI chip boom. India's market cap slipped to approximately USD 4.8 trillion. This repositioning reflects how AI infrastructure demand has sharply re-rated semiconductor-heavy economies.

Crypto Volatility: Bitcoin dropped 5.72% within a 24-hour window, shedding more than USD 3,000 in value, as risk appetite for speculative assets wavered even while broader equities remained firm. The divergence underscored continued differentiation between institutional equity flows and retail-driven crypto sentiment.

Crude Oil: WTI crude surged +5.77% to USD 94.59/bbl and Brent climbed +4.23% to USD 96.83/bbl, driven by tightening supply expectations and stronger demand signals from China. The jump pushed energy-linked equities and coal prices higher — coal rose +3.33% to USD 141.30/MT. Gold COMEX eased modestly (-1.50%) to USD 4,503.30/oz as risk appetite improved, while copper gained +3.91% to USD 666.05¢/lb on industrial demand optimism.

PHILIPPINES STRATEGY

PSEi Snaps Losing Streak — Foreign Funds Return. The PSEi surged 113.37 points or +1.95% to close at 5,912.69 on June 2, recovering decisively from the MSCI-driven lows of late May. Five of six PSE sectors finished in positive territory, with Services (+4.84%) leading on ICT's massive PHP 1.66 billion turnover day. The breadth was constructive: 98 advances against 79 declines, with 237 issues traded. Total market turnover reached PHP 6.79 billion — a healthy normalization from the PHP 26 billion MSCI dislocation session on May 29.

Critically, foreign funds flipped to net buying on June 2: foreign buying reached PHP 3.74 billion against foreign selling of PHP 3.11 billion, yielding net foreign buying of PHP 628.7 million (USD 10.2 million). This marks a meaningful reversal from the sustained foreign net selling that characterized the MSCI rebalancing weeks. Month-to-date, however, net foreign selling for June still stands at USD 404.2 million, and year-to-date net foreign selling stands at USD 223.8 million — a reminder that the structural foreign outflow trend has not yet fully reversed.

Block trades provided additional depth: BPI (PHP 180.9M), AC (PHP 43.0M), RLC (two tranches, PHP 72.7M combined), SMPH (PHP 36.8M), MYNLD (PHP 39.7M), and a large EMI block of PHP 362M. The PHL 10-year bond yield ticked up to 7.526% from 7.431%, modestly widening the yield premium versus US Treasuries — a watch item for REIT and fixed-income-sensitive investors.

CORPORATE UPDATES

ICT | INTL CONTAINER TERMINAL SERVICES — NEW 52-WEEK HIGH

International Container Terminal Services, Inc. (ICTSI / ICT) was the standout performer of the June 2 session, surging to PHP 830 — the highest level in over a year — on PHP 1.66 billion in individual turnover, the largest of any single stock on the day. Foreign funds were the primary buyers, with net foreign buying of PHP 662 million into ICT, validating the stock's re-rating thesis as ICTSI continues to expand its global port network and benefit from recovering international trade volumes. The stock opened at PHP 783 and touched an intraday high of PHP 830, holding firm through the close. The surge represents a meaningful technical breakout above previous resistance, and with global container volumes trending higher alongside the easing of US-China trade tensions, the fundamental backdrop remains supportive.

ICTSI operates over 30 port terminals across multiple continents and generates a significant portion of earnings in hard currency, insulating it from peso weakness. The company's disciplined capex approach and high free cash flow generation have consistently underpinned its dividend capacity and valuation multiple. The June 2 session volume and price action suggest renewed institutional conviction in the name.

 **BUY | ICT @ PHP 830.00**

JFC | JOLLIBEE FOODS CORP. — RECOVERY FROM MSCI LOW

Jollibee Foods Corp. (JFC) continued its recovery from the MSCI-driven 52-week low of PHP 126.90 hit on May 29, closing June 2 at PHP 134.90 on PHP 425.7 million in turnover. Foreign funds were net buyers of PHP 9.75 million, a constructive

signal following weeks of sustained foreign net selling related to JFC's removal from the MSCI Philippines Index. The stock opened at PHP 131, touched a high of PHP 135.70 before settling at PHP 134.90. A significant block transaction of 1.5 million shares at PHP 126.90 and 2.87 million shares at PHP 126.90 — conducted on May 29 — absorbed large forced selling, suggesting institutional accumulation at the lows.

JFC's fundamental case remains intact: the company is one of the Philippines' largest food service groups with operations across Asia Pacific, North America, and Europe. The MSCI removal was a mechanical flow event, not a fundamental development. At PHP 134.90, JFC trades at a meaningful discount to its longer-term valuation range, making the current price level an attractive re-entry point for medium-to-long-term investors.

● **ACCUMULATE | JFC @ PHP 134.90**

TEL / DITO | PHILIPPINE TELECOM LANDSCAPE — 5G & NEW ENTRANTS

PLDT Inc. (TEL) reported Q1 2026 results highlighting 5G as a core growth engine for Smart Communications. 5G traffic surged 68% year-on-year and 5G-capable devices on Smart's network rose 34% to 12.2 million units. Gross service revenues grew 2.23% to PHP 56.51 billion, though attributable net income dipped 1.77% to PHP 8.87 billion as higher operating expenses weighed on the bottom line. The company is deploying AI tools through its TNT brand to personalize offers based on consumption patterns — a data monetization strategy that could expand ARPU over time. TEL closed June 2 at PHP 1,151, off its intraday high of PHP 1,166, with net foreign selling of PHP 3.72 million.

Separately, the Department of Information and Communications Technology (DICT) confirmed that a Japanese full-blown telecommunications provider — offering both satellite and terrestrial services — has filed an application to enter the Philippine market. Combined with two US satellite providers already in advanced stages of regulatory clearance, this brings the total new entrant pipeline to three operators. The Konektadong Pinoy Act, which liberalized the data transmission sector by removing the congressional franchise requirement, is the structural enabler. DICT Secretary Aguda noted the Japanese applicant remains at an early stage and declined to identify the firm, though industry context points to major Japanese telecoms with regional ambitions.

● **MONITOR | TEL @ PHP 1,151.00**

FLI | FILINVEST LAND — P9B BOND SUCCESSFULLY PLACED

Filinvest Land, Inc. (FLI) completed the issuance of its PHP 9 billion Series E three-year bonds due 2029, listed on the Philippine Dealing & Exchange Corp. (PDEX) on June 2. The bonds carry a fixed annual coupon of 7.3993%, the third tranche of FLI's PHP 35 billion shelf-registered bond program. This follows a PHP 11.4 billion tranche in December 2023 and a PHP 12 billion tranche in March 2025, both of which funded retail and industrial expansion. The transaction demonstrates FLI's continued access to the domestic debt capital market, with a broad syndicate including BDO Capital, BPI Capital, China Bank Capital, East West, First Metro, Land Bank, RCBC Capital, and SB Capital. FLI closed June 2 at PHP 0.71, up 1.43%.

For equity investors, the successful bond placement reduces near-term refinancing risk and provides FLI with liquidity headroom to execute on its PHP 9.3 billion project launch pipeline for 2026. The 7.3993% coupon reflects current market pricing for investment-grade property issuers and was assigned a PRS Aaa rating by PhilRatings. FLI's landbank of 1,774 hectares and its diversified mix of residential, industrial, and retail assets remain key drivers of its credit profile and long-term equity value.

● **MONITOR — Watch for execution on project launches | FLI @ PHP 0.71**

MEG | MEGAWORLD CORP. — Q1 RESERVATION SALES +10.4%

Megaworld Corp. (MEG) reported Q1 2026 reservation sales of PHP 29.7 billion, up 10.4% year-on-year, outpacing broader industry sentiment amid a supply-heavy Metro Manila condominium market. The parent company Megaworld contributed PHP 21.2 billion (71% of group total), anchored by the 54-story Uptown Modern at Uptown Bonifacio (PHP 3 billion in Q1 sales) and strong performance in McKinley West, Winford Resort Estate Manila, and provincial projects in Laoag and Ilocos Norte. The 14-story Santé Residences Palawan — the Philippines' first WELL-certified residential development — is expected to contribute PHP 6.5 billion over its sales life, while Ilocandia Beach Village targets PHP 4 billion in sales. Provincial expansion is emerging as a structural growth driver for Megaworld, diversifying reliance away from Metro Manila supply-constrained markets. Leasing revenues also grew 11% to PHP 22 billion in FY2025, with office occupancy underpinned by BPO demand. MEG closed June 2 at PHP 2.06, up 0.49% on PHP 5.03 billion turnover, with net foreign selling of PHP 2.48 million. The stock remains in accumulation range for investors with a medium-term horizon, with the township model providing recurring income visibility.

● **MONITOR — Accumulate on weakness below PHP 2.00 | MEG @ PHP 2.06**

ROCK | ROCKWELL LAND — ALABANG TOWN CENTER REVAMP UNVEILED

Rockwell Land Corp. (ROCK) unveiled its master development plan for Alabang Town Center (ATC), the 17.5-hectare commercial estate it acquired for PHP 21.6 billion in December 2025 from the Madrigal/Bayot group (following Ayala Land's earlier exit from the joint venture). World-renowned architect Carlos Ott — known for the Opéra Bastille in Paris and Rockwell's Proscenium development in Makati — has been tapped to lead the redesign, working alongside local architect Jun Rodriguez. Rockwell's vision is to transform ATC into a modern suburban lifestyle destination while preserving the identity that made it a community landmark for decades.

The redevelopment strategy follows Rockwell's proven Power Plant Mall playbook: high-end mixed-use retail anchored by premium residential and commercial components. ATC adds approximately 137,000 sqm of gross leasable area to Rockwell's portfolio — a 58% increase from its current footprint. The property serves the affluent residential communities of Alabang, Ayala Alabang Village, Las Piñas, and Cavite, making it a strategic southern Metro Manila foothold. ROCK closed June 2 at PHP 2.09, with modest net foreign buying of PHP 208,690. The acquisition installment structure — three equal payments through December 2027 — provides manageable cash flow phasing. AREIT note: as ROCK's REIT subsidiary, AREIT may benefit in the medium term from ATC asset injection potential.

● ACCUMULATE — ATC upside to unlock over 2–3 years | ROCK @ PHP 2.09
DD / MM | DOUBLEDAGON — MERRYMART DELISTING DEFENDED, VOTE JULY 7

MerryMart Consumer Corp. (MM) founder and DoubleDragon Corp. (DD) chairman Edgar "Injap" Sia II defended the proposed delisting of MerryMart from the PSE at the company's shareholder briefing, framing the consolidation as a strategic move to streamline operations and build resilience against macroeconomic headwinds. "The silver lining is not yet clear on the horizon," Sia told shareholders, acknowledging the challenging equity market environment. The board has approved the delisting, with a shareholder vote set for July 7, 2026. DoubleDragon's tender offer — running from May 18 to June 16 — offers PHP 0.48 per MerryMart share (a 20% premium to pre-announcement trading), payable 50% in cash and 50% in DoubleDragon shares valued at PHP 9.30 per share.

Minority shareholders should note that the DD share component is valued at a significant discount to DoubleDragon's book value of PHP 19.21 per share, and the tender offer price of PHP 0.48 is materially below MerryMart's PHP 1.00 IPO price. Abacus Securities has characterized the transaction as a low-risk arbitrage trade ahead of the June 24 settlement date, given that DD management has confirmed it will absorb 100% of tendered shares. For DD equity holders, MerryMart's PHP 7 billion in annual recurring grocery and pharmacy revenue provides a stable non-cyclical income stream within the broader DoubleDragon ecosystem. DD closed June 2 at PHP 11.00, up 7.84%, on PHP 4.97 billion turnover. MM remains suspended from trading.

● TENDER — MerryMart offer at PHP 0.48 (deadline June 16) | MM @ PHP 0.43

● MONITOR | DD @ PHP 11.00

MRSGI | METRO RETAIL STORES GROUP — BILIRAN STORE OPENING

Metro Retail Stores Group, Inc. (MRSGI) continued its Visayas network expansion with the opening of a new store in Biliran province, extending the company's footprint into an underserved market. The Biliran opening is part of MRSGI's deliberate strategy to penetrate provincial communities where modern retail penetration remains low and competition from large mall-anchored players is limited. MRSGI closed June 2 at PHP 1.10 with minimal trading volume of 9,000 shares. The stock remains thinly traded at current levels but the fundamental case for regional expansion into mid-tier provinces is sound, particularly as consumer spending outside Metro Manila continues to grow on the back of OFW remittances and improving road infrastructure. MRSGI remains on coverage watch.

● MONITOR | MRSGI @ PHP 1.10

FGEN | FIRST GEN CORP. — NKC PHILS. ROOFTOP SOLAR IN CEBU

First Gen Corp. (FGEN) signed a deal to install and operate a 1.84-megawatt-peak (MWp) solar photovoltaic system at the production facilities of NKC Manufacturing Philippines Corp. within the Mactan Economic Zone in Cebu. NKC Phils. — a Philippine subsidiary of Japan's NKC Group, which manufactures precision rubber seals, automotive parts, and automated logistics systems — selected First Gen as its renewable energy partner amid rising energy costs and environmental sustainability commitments. Construction began following the May 14 agreement, with completion targeted before year-end. FGEN will construct, own, and maintain the system under a power purchase agreement structure.

The NKC deal is part of FGEN's growing commercial and industrial (C&I) solar business, which complements its ~1,700 MW portfolio of hydro, geothermal, wind, and solar assets. C&I solar represents a capital-light recurring revenue stream as more industrial locators in Philippine economic zones seek to cut electricity costs and meet ESG targets. FGEN closed June 2 at PHP 16.12, up slightly from PHP 16.10 on June 1, with PHP 4.03 billion turnover. The stock remains a clean energy proxy with solid long-term fundamentals.
