

FIRST NEWS

Pre-Market Institutional Equity Research

Publication: Monday, 07 September 2026 | Covering PSE session: Friday, 04 September 2026

Unit 1105 PSE Tower, BGC, Taguig City · (02) 8834-7765 · damarketsec.com

ACTIONABLE HIGHLIGHTS · THE CALL

PSEi eked out **+0.35% to 6,090.60 (+21.18)** on a green-but-narrow tape — advancers 108 vs. decliners 93 — yet foreign investors were net sellers of **₱357.82M**, concentrated in index heavyweights. Leadership rotated into gold miners and catalyst-driven names.

ACCUMULATE — LEADERSHIP & CATALYSTS

- **APX (Apex Mining)** — Day's standout: ₱228.2M turnover (#2 by value) and the market's largest single-name foreign buy, +₱24.6M, as gold holds near record ~\$4,467/oz. Momentum + flow align.
- **ICT** — Foreign flow flipped to net buying +₱21.2M on the Manzanillo (Mexico) capacity-expansion catalyst; #1 by value at ₱440.1M. Accumulate-on-dips discipline re-engages.
- **ALI** — Buyers returned: +₱11.4M foreign, close ₱15.28 at session high; the leasing-pivot accumulate thesis is back on flow.

MONITOR — WATCH THE FLOW

- **Banks (MBT / BDO / BPI)** — PHL 10-yr at 7.269% keeps the >7% bank-caution trigger live. MBT -₱80.2M and BDO -₱28.2M foreign selling; BPI a bright spot at +₱43.0M. Sector Monitor, BPI relative-strength.
- **AEV** — AIC airport-network / Asian-route story is a long-run value driver, but -₱6.3M foreign and two ₱22.5M block crosses today. Accumulate-on-weakness intact; watch tape.
- **FGEN** — GEOP geothermal supply pipeline widening (Tropical Hut sites); H1 revenue +73%. But -₱4.2M foreign and El Niño hydro risk. Neutral pending flow.

CAUTION — DISTRIBUTION & MACRO OVERHANG

- **Index heavyweights** — Heavy foreign distribution: SM -₱91.9M, MBT -₱80.2M, URC -₱53.2M, SSI -₱44.9M, AC -₱36.0M, JFC -₱27.8M. The net-sell headline sits under a green index.
- **Macro** — Aug CPI hot at 6.1% y/y (rice +19.4%); peso through ₱62 (₱62.655); 10-yr >7%; BSP at 5.0%. Keep risk budgets disciplined.

SESSION DASHBOARD

PSEi Close	6,090.60	+21.18 (+0.35%)

EUR-USD	1.1628	1.1620	euro softer

PHILIPPINES STRATEGY

Macro. August CPI ran hot at **6.1% y/y** (in line with the 6.1% estimate) with core at 4.1% and rice inflation still elevated at +19.4% y/y; headline rose +0.6% m/m (vs. +0.5% est.), taking the Jan–Aug average to 5.2%. With BSP already at 5.0% (28 Aug hike), the PHL 10-yr above 7%, and the peso pushing through ₱62 to ₱62.655, the macro backdrop stays defensively tilted — banks remain on Monitor under the >7% yield trigger.

Where we lean in. The tape rewards catalyst and commodity leadership over index beta. We lean into gold (APX momentum + foreign buying), the ICT Mexico-capacity re-rating (flow reversed to buyers), and ALI as its accumulate thesis re-engages on positive flow. We fade crowded heavyweight distribution (SM, URC, SSI, AC) and keep banks on a Monitor footing — with BPI the sole large-cap drawing meaningful foreign buying (+₱43.0M).

SECTORAL SUMMARY

CORPORATE STANCE CARDS

ICT · ICTSI shares climb on Mexico terminal expansion

ICTSI is lifting the annual capacity of its Mexican unit, Contecon Manzanillo (CMSA), toward 2 million TEUs after securing approval to handle vessels with drafts up to 15.5 metres — positioning Manzanillo to service some of the largest boxships crossing the Pacific from Asia (per Daily Tribune / BusinessWorld). The Port of Manzanillo is a key Pacific gateway for the group, and the upgrade extends ICTSI's multi-terminal, dollar-earning franchise. On the tape, ICT was the day's most active name by value (₱440.1M) and, notably, foreign investors flipped to net buyers of +₱21.2M after a stretch of sustained selling. The stock closed ₱934.50, up on the session.

Analysis. The capacity catalyst reinforces the long-run dollar-earner thesis, and the reversal in foreign flow is the key signal — buyers returned on fundamental news rather than on a technical bounce. We restore accumulate-on-dips discipline; the block crosses (₱226.5M) reflect institutional repositioning, not distress.

Regular-market value ₱440.1M; additional block sales ₱226.5M flagged separately.

Stance: **ACCUMULATE ON DIPS**

APX · Apex Mining leads the tape as gold holds near records

Apex Mining was the session's clearest leadership name: ₱228.2M in turnover (second only to ICT) and the market's single largest net foreign buy at +₱24.6M, closing ₱17.20 near the intraday high of ₱17.94. The move tracks gold's stay near record territory (~\$4,467/oz COMEX) even after a modest -1.28% pullback, and it fits the running Mining & Oil leadership — the sector added +0.75% (+156.87 pts) to 21,065.44.

Analysis. APX offers the cleanest listed leverage to the gold trade, and today flow, price and sector momentum all pointed the same way. We treat it as a core commodity-leadership holding while bullion sits near highs; the principal risk is a sharp reversal in the gold price or a peso snap-back, so we size for volatility.

Stance: **ACCUMULATE**

ALI · Foreign buyers return; leasing-pivot thesis re-engages

Ayala Land closed ₱15.28 at its session high on ₱133.8M turnover, with foreign investors net buyers of +₱11.4M — a constructive turn after the flow reversal that disrupted the accumulate case in late August. The leasing-pivot thesis (recurring lease income underpinning the parent-buyback floor reference) remains our anchor.

Analysis. The return of positive foreign flow at the highs is the trigger we were waiting for. With ALI trading well below cycle peaks and leasing income cushioning the residential cycle, we re-engage the accumulate call, watching for follow-through in foreign participation.

Stance: **ACCUMULATE**

AT · Atlas Mining pauses after multi-session accumulation

Atlas Mining held its uptrend, closing ₱21.40 (high ₱22.00) on ₱82.97M turnover, but foreign flow turned to net selling of -₱3.4M — the first pause after several sessions of foreign accumulation on the gold/copper theme. The consolidation comes with the broader metals complex bid.

Analysis. One session of light foreign profit-taking does not break the accumulation trend; we read it as consolidation within an uptrend rather than distribution. We keep the accumulate-on-dips stance and would add on pullbacks that hold prior support, alongside APX as our metals pair.

Stance: **ACCUMULATE ON DIPS**

Banks (MBT / BDO / BPI) · Yield trigger keeps the sector on Monitor — BPI the outlier

With the PHL 10-year at 7.269% — above the 7% bank-caution threshold — and hot 6.1% August CPI reinforcing a higher-for-longer rate path, the large-cap banks stayed under foreign pressure: MBT −₱80.2M (the day's heaviest single-name selling) and BDO −₱28.2M. BPI was the clear exception, drawing +₱43.0M of foreign buying and closing ₱105.40.

Analysis. We keep the sector on Monitor while the 10-year holds above 7%: rising funding costs and mark-to-market pressure on bond books cap near-term re-rating. Within the group, BPI's standout foreign buying and firmer close mark it as the relative-strength pick; MBT and BDO stay Monitor pending a yield reprieve.

Stance: **MONITOR (BPI RELATIVE-STRENGTH)**

FGEN · First Gen widens GEOP geothermal supply footprint

First Gen continues to expand its retail renewable-supply business under the Green Energy Option Program, adding sites (including Tropical Hut locations) to a growing roster of direct geothermal customers spanning malls, hospitals and food producers (per BusinessWorld). The strategy leans on EDC's geothermal fleet, which drove a ~73% jump in H1 group revenue. FGEN closed ₱26.10 with foreign flow at −₱4.2M.

Analysis. The GEOP pipeline is a steady, margin-accretive annuity that de-risks earnings, but each contract is individually small and today's flow was negative, with El Niño a swing factor for the hydro portfolio into H2. We hold Neutral, upgrading only on a turn in foreign participation or firmer hydro conditions.

Stance: **MONITOR / NEUTRAL**

AEV · Aboitiz InfraCapital courts Asian routes to lift airport traffic

Aboitiz InfraCapital (AEV's infrastructure arm) is pursuing additional Asian flight frequencies and airline partners across its airport network — Mactan-Cebu, Laguindingan and Bohol-Panglao — to sustain passenger-traffic growth (per BusinessWorld). MCIA has been posting record monthly traffic, underpinning the infrastructure value-creation story. AEV closed ₱37.50 with foreign flow at −₱6.3M, and two matched block crosses of ₱22.5M each (₱37.56) changed hands.

Analysis. The airport-connectivity build-out is a genuine long-run value driver for the conglomerate, but today's combination of foreign selling and block crossing argues for patience. The accumulate-on-weakness thesis is intact; we keep AEV on Monitor and prefer to add into flow-confirmed dips.

Stance: **MONITOR**

IMI · AI-hardware / EMS proxy keeps quiet accumulation

Integrated Micro-Electronics closed ₱7.43 on ₱49.3M turnover with foreign flow modestly positive at +₱0.32M — steady, if unspectacular, participation in the local AI-hardware / EMS proxy. The name remains geared to the global electronics-manufacturing and AI-infrastructure build-out narrative.

Analysis. IMI is our preferred listed expression of the EMS / AI-hardware theme; low-key but persistent foreign buying supports the accumulate-on-dips stance. We stay constructive while global electronics demand signals hold up.

Stance: **ACCUMULATE ON DIPS**

SMARTWATCH

IPO pipeline

PSE sponsor-rule changes may widen the SME IPO pipeline, analysts say — a structural positive for exchange listings and deal flow (BusinessWorld).

IPO: NextAsia Land	NextAsia Land is preparing for an eventual PSE listing, adding to the property-sector pipeline (BusinessWorld).
Aviation read-through	Cathay Pacific is studying additional PHL flight frequencies — supportive for airport (AIC/AEV) and carrier (CEB, PAL) traffic; PAL closed +ve with foreign buying +₱0.72M, CEB steady.
Share buybacks	Buyback activity flagged in SM, URC, OPM and FRUIT — a floor signal worth noting where it coincides with heavy foreign selling (SM, URC).
AREIT	No standalone AREIT feature this session (no AREIT-specific corporate news). AREIT closed ₱37.50, foreign –₱0.19M; the ₱35.60 support / ₱48.06 consensus-target thesis is unchanged and monitored in trackers only.
