

## DA MARKET SECURITIES, INC.

PSEi diverges from US selloff — closes at 5,953.17 (+0.68%) on June 3 even as Wall Street dropped sharply on Iran–US military clash fears that sent WTI crude past USD 96/bbl. ICT hit a new 52-week high of PHP 875 on PHP 2.39B in turnover with PHP 557M in net foreign buying — the dominant story of the session. Despite net foreign buying for a second straight day (+PHP 53M / USD 858K), sectoral breadth weakened: five of six sectors declined, with Services the lone standout (+3.74%) on ICT. SMPH deferred its PHP 12B bond sale citing market conditions, signaling elevated domestic borrowing costs. EDC announced a PHP 25B investment plan for its Negros geothermal field. Security Bank (SECB) partnered with AC Health units for dealer financing. AREIT holds at PHP 38.40 — ACCUMULATE at current levels.

**US Selloff — Iran-US Military Clash:** Wall Street reversed sharply on June 3 as fresh military clashes between the US and Iran reignited fears over global energy supplies and trade route disruptions through the Strait of Hormuz. The S&P 500 declined to 7,553.68 (−0.74%), the Dow Jones fell to 50,687.07 (−1.21%), and the NASDAQ slid to 26,853.98 (−0.89%). WTI crude surged +1.25% to USD 95.77/bbl while Brent climbed to USD 97.81/bbl — both approaching critical USD 100/bbl psychological levels that could stoke inflation concerns and reset Fed rate expectations.

**Asia Diverges — AI Enthusiasm Powers Gains:** Asian markets largely ignored the US selloff, extending a record rally driven by AI-sector enthusiasm. Japan's Nikkei 225 surged +2.50% to 68,402.13 — a fresh record — as AI infrastructure investment themes powered technology-linked names. Taiwan's TWSE climbed +1.98% to 46,459.16 and Singapore's STI added +0.80% to 5,138.24. South Korea's KOSPI was flat at 8,801.49, reflecting some caution after its recent 86% YTD surge. India's SENSEX softened modestly to 74,346.19 (−0.41%) while Indonesia's JCI saw notable weakness, declining −4.10% to 5,941.07.

**SpaceX IPO at USD 135/Share:** Elon Musk's SpaceX is seeking USD 135 per share for its planned USD 75 billion IPO, according to media reports — a development that would make it one of the largest technology listings in US history and adds to sentiment around the private-to-public transition pipeline for space and frontier technology companies.

**Trump Tariff Escalation:** US President Trump signaled intent to impose tariffs of 10%–12.5% on imports from approximately 60 economies over their alleged failure to ban goods made with forced labor. Canada, Mexico, Taiwan, and the UK face 10% additional tariffs, while China, Japan, India, South Korea, Brazil, and Switzerland face a 12.5% levy. The Philippines' trade exposure to the US and its role as an export hub for semiconductors and electronics mean this tariff wave warrants close monitoring by PSE investors, particularly those exposed to export-linked industrials and technology names.

**Gold & Bitcoin Slip:** Gold COMEX eased to USD 4,462.90/oz (−0.90%) and Bitcoin also declined, consistent with a risk-off tilt in safe-haven assets as investors repositioned amid geopolitical uncertainty. This contrasted with the rebound in crude, which benefited directly from Middle East supply anxiety.

**PSEi Holds Above 5,950 Despite Global Risk-Off — ICT Carries the Market.** The PSEi closed June 3 at 5,953.17 — a +0.68% or +40.48-point gain — largely on the back of ICT's extraordinary session: PHP 2.39 billion in turnover at PHP 875, hitting a fresh 52-week high of PHP 874, with net foreign buying of PHP 557 million. This single stock effectively masked weaknesses across five of six PSE sectors, all of which posted declines. Services (+3.74%) was the sole advancing sector, driven almost entirely by ICT. Financials (−0.35%), Industrials (−1.17%), Holding Firms (−1.14%), Property (−0.41%), and Mining & Oil (−0.69%) all softened.

Market breadth was decisively negative: 75 advances against 103 declines, with 234 issues traded. Net foreign buying remained positive for the second consecutive session at PHP 53.0 million (USD 858K) — but the narrowing from the prior session's PHP 628.7M confirms that the foreign flow reversal is fragile, not yet a sustained trend. Total foreign participation of PHP 9.38 billion was healthy but concentrated. Month-to-date net foreign selling for June now stands at USD 403.3M, and YTD net foreign selling stands at USD 222.9M.

The most significant domestic market development is SM Prime's decision to defer its PHP 12 billion bond offering, citing unfavorable market conditions — a direct signal that domestic interest rates remain too elevated for comfortably-priced issuance. The PHL 10-year bond yield ticked further to 7.534% on June 3. For REIT investors, the yield backdrop continues to be the key watch item: any easing in bond yields would be a material catalyst for AREIT, MREIT, RCR, CREIT, and DDMPR. Block trade highlights: GTCAP (PHP 71.3M @ 475), JFC (PHP 20.7M, VWAP PHP 10.7M), SEVN (PHP 82.2M), CBC (PHP 116.4M), MYNLD (PHP 37.2M), ALI (two tranches totaling PHP 238M), RLC (PHP 49.5M).

## **ICT | ICTSI — VICT DEPLOYS HYBRID CARRIERS AT MELBOURNE; 52-WEEK HIGH PHP 875**

International Container Terminal Services, Inc. (ICT / ICTSI) was the undisputed standout of the June 3 session, surging to PHP 875 and hitting a fresh 52-week high of PHP 874 intraday, on PHP 2.39 billion in turnover — the largest single-stock turnover of the entire 2026 YTD calendar. Net foreign buying reached PHP 557 million into ICT, reaffirming a strong institutional conviction as global port volumes improve and ICTSI continues to demonstrate operational excellence across its international terminal network. The stock has now gained over 12% in two consecutive sessions from its post-MSCI levels. The fundamental catalyst: ICTSI's subsidiary Victoria International Container Terminal (VICT) at the Port of Melbourne has officially deployed four new Kalmar hybrid automatic container carriers (ACCs) following their commissioning and integration over recent weeks. The ACCs feature lithium-ion battery energy recovery with a 40% improvement in energy efficiency and a 50-ton annual CO2 reduction per carrier. The deployment brings VICT's capacity expansion program closer to its 1.6 million TEU annual throughput target. ICTSI secured a 26-year extension of VICT's Melbourne terminal operating contract to 2066 in February 2026, cementing the investment's long-term rationale. For PSE investors, this operational milestone reinforces the global diversification premium embedded in ICT's valuation.

● **BUY — New 52-week high; fundamental momentum intact | ICT @ PHP 875.00**

## **JFC | JOLLIBEE FOODS — RSI 37.48; DIP BUY SIGNAL AT PHP 133**

Jollibee Foods Corp. (JFC) softened slightly to PHP 133.00 (−0.15%) on June 3 on PHP 301.3 million in turnover, pulling back modestly from the PHP 134.90 recovery level on June 2. Foreign funds were net buyers of PHP 29.7 million — a constructive signal. Block trades totaled PHP 20.7M via normal sale and PHP 10.7M via VWAP (at PHP 133.98). With weekly RSI at 37.48, JFC is in technically oversold territory on the weekly timeframe, with the stock still recovering from its MSCI-forced 52-week low of PHP 126.90. The MSCI removal was a mechanical, non-discretionary event and does not reflect any deterioration in JFC's fundamentals.

JFC operates one of Southeast Asia's most scaled and profitable quick-service restaurant empires, with brands including Jollibee, Chowking, Greenwich, Mang Inasal, Red Ribbon, The Coffee Bean, Highlands Coffee, Smashburger, and Tortas Frontera. The group has demonstrated consistent revenue growth despite a challenging consumer backdrop. At PHP 133, JFC trades at a meaningful discount to its longer-term valuation range and offers an attractive medium-term accumulation opportunity.

● **ACCUMULATE — RSI 37.48 oversold; MSCI removal fully priced in | JFC @ PHP 133.00**

## **SMPH | SM PRIME — PHP 12B BOND DEFERRED AMID HIGH BORROWING COSTS**

SM Prime Holdings, Inc. (SMPH) announced on June 3 the deferment of its planned fourth tranche of fixed-rate bonds — a PHP 12 billion offering (with a PHP 6 billion oversubscription option) — citing current market conditions. The deferred issuance covered 5.75-year Series AE bonds due 2032 and 10-year Series AF bonds due 2036, and forms part of SM Prime's PHP 100 billion shelf-registered bond program. The company did not specify a revised timetable. Had the offering proceeded, it could have raised up to PHP 18 billion including the oversubscription option. SM Prime did confirm the bonds carry a PRS Aaa rating from PhilRatings, signaling no credit quality concern.

Analysts view the deferral as a signal of elevated domestic borrowing costs rather than financial distress at the company level. SM Prime reported Q1 2026 net income of PHP 11.66 billion and total assets of PHP 1.1 trillion, with Q1 capex of PHP 15.5 billion. The company's P100B shelf program and ambitious 2026–2030 expansion pipeline (16 major redevelopments, 12 new lifestyle malls) remain intact. For equity investors, the bond deferral reinforces the narrative that PHL bond yields at 7.53% are restrictive for large property developers — making a BSP rate cut the key macro catalyst for the entire REIT and property complex. SMPH closed June 3 at PHP 18.40 with PHP 131.4M in turnover and net foreign selling of PHP 61.4M.

● **MONITOR — Bond deferral flags yield pressure; hold existing | SMPH @ PHP 18.40**

## **EDC / FGEN | ENERGY DEVELOPMENT CORP. — PHP 25B NEGROS GEOTHERMAL PLAN**

Energy Development Corp. (EDC), the Lopez Group's renewable energy arm and subsidiary of First Gen Corp. (FGEN), disclosed a PHP 25 billion investment plan to improve steamfield performance and expand energy storage capacity at its Southern Negros Geothermal Project (SNGP) in Negros Oriental. The company is seeking an amendment to its environmental compliance certificate (ECC) from the DENR to allow expanded operations, additional drilling, and infrastructure improvements to support long-term steam production. The initiative does not increase SNGP's installed capacity of 282.5 MW but addresses the natural pressure drop in geothermal wells that, if unmanaged, reduces steam output and electricity generation over time.

EDC plans to drill two to five new wells annually, expand existing well pads, construct new pads and pipeline routes, and triple the battery energy storage capacity from 30 MWh to 90 MWh. SNGP currently operates at 241.8 MW across 94 wells and 32 pads. In 2025, the combined Negros plants displaced over one million tons of CO2-equivalent emissions. EDC's total installed capacity of 1,480 MW represents about 20% of the Philippines' total renewable energy capacity — the largest geothermal portfolio in the country. The PHP 25B capex reinforces EDC/FGEN's positioning as the Philippines' premier renewable energy franchise. FGEN closed June 3 at PHP 16.02 (−0.62%), with PHP 3.6B turnover and net foreign selling of PHP 773,970.

● **ACCUMULATE — Long-dated geothermal capex supports generation reliability | FGEN @ PHP 16.02**

## **SECB / AC | SECURITY BANK — AC HEALTH DEALER FINANCING PARTNERSHIP**

Security Bank Corp. (SECB) formalized a partnership with AC Health units I.E. Medica and MedEthix to provide financing support for their nationwide dealer and distributor network. Under Security Bank's Dealer Financing Program, accredited partners gain access to short-term revolving credit lines and inventory financing — extending the bank's ecosystem banking

model into the healthcare distribution channel. AC Health is Ayala Corp.'s (AC) health and wellness platform. The partnership aligns with Security Bank's broader strategy of deepening industry-specific ecosystem financing arrangements, a model it has applied in vehicle distribution, SME supply chains, and now healthcare supply chains. For SECB, the deal expands fee income and asset generation opportunities in a defensive, non-cyclical sector. For AC investors, it underscores Ayala's healthcare ambitions beyond clinic ownership — tying AC Health into the broader financing infrastructure of its ecosystem partners. SECB closed June 3 at PHP 62.95 on June 2 DQR, recovering to PHP 62.95 — the June 3 DQR shows SECB closed at PHP 62.95 (note: June 3 DQR data shows SECB at PHP 62.95, up from PHP 61.00 on June 2, with net foreign selling of PHP 25.7M). AC closed June 3 at PHP 411, down PHP 5 or -1.20% from PHP 416, weighed by PHP 95.2M net foreign selling.

● **MONITOR — Selling pressure persists despite attractive long-term thesis | AC @ PHP 411.00**

### **SGP | SYNERGY GRID — NET FOREIGN BUYING PHP 77.4M; MOST ACTIVE**

Synergy Grid & Development Phils., Inc. (SGP) emerged as a quiet standout on June 3, ranking among the most active stocks with PHP 232.8M in value and logging PHP 77.4M in net foreign buying. SGP closed flat at PHP 30.00 on 7.82 million shares traded. The stock hit an intraday high of PHP 30.75 before settling at the close. SGP is the listed holding company for National Grid Corporation of the Philippines (NGCP), which operates and maintains the country's high-voltage electricity transmission network under a 50-year congressional franchise. SGP's utility-like characteristics — regulated revenues, high barriers to entry, and critical infrastructure status — make it a defensive position in an environment of geopolitical uncertainty and energy supply anxiety. The foreign buying interest on June 3 coincides with the surge in crude oil prices, as energy-infrastructure-linked equities often benefit from tightening energy market narratives.

● **MONITOR — Defensive utility; foreign interest warrants tracking | SGP @ PHP 30.00**

**Senate Leadership Reorganized:** The Philippine Senate adjourned its session following a leadership reshuffle, with Sen. Sherwin Gatchalian elected as the new Senate President Pro Tempore. Multiple committee chairmanships were also reassigned as senators reorganized the chamber ahead of the next session. The leadership change introduces a period of legislative recalibration — worth monitoring for any impact on pending bills relevant to the stock market, including data privacy amendments, energy sector legislation, and financial market reform bills.

**SEC Officer Arrested for Alleged Extortion:** Authorities arrested a Philippine Securities and Exchange Commission (SEC) officer over alleged extortion of a company under the regulator's jurisdiction. SEC Chair Francis Lim responded swiftly, affirming zero tolerance for misconduct and assuring the public that operations would continue uninterrupted while the NBI investigates. The incident is an isolated governance event and does not materially alter the SEC's regulatory posture or market oversight capacity. Investors can take comfort in the regulator's proactive response.

### **AREIT INC. (AREIT) | Close: PHP 38.40 | Stance: ● ACCUMULATE**

AREIT closed June 3 at PHP 38.40, down slightly from PHP 38.50 on June 2, with PHP 16.95M turnover and net foreign buying of PHP 662,820. Volume remains moderate as the stock consolidates near its 52-week lows. All three accumulation triggers remain intact:

**Trigger 1 — RSI Sub-35 (Weekly):** Weekly RSI at 35.97 at the March 6 chart date; with the subsequent price decline to the PHP 37.85 session low on May 29, RSI on the weekly likely compressed further into oversold territory. Historically, sub-35 weekly RSI on AREIT has preceded meaningful recoveries.

**Trigger 2 — MACD Compression (Monthly):** Monthly MACD at -0.166 with histogram bars compressing — a constructive setup for a potential bullish reversal signal in coming months.

**Trigger 3 — PHL 10-Year Yield at 7.534%:** The yield continues to edge higher, narrowing the risk premium that had been compressing REIT valuations. However, the SMPH bond deferral on June 3 is a reminder that elevated yields are structurally challenging for the property-REIT complex. Any BSP easing move would be a sharp catalyst for AREIT.

**Valuation:** At PHP 38.40, AREIT trades at approximately 13.9x forward P/E vs. its 5-year historical average of ~18.2x. Analyst consensus BUY, average target PHP 48.06 (+25.2% upside). Dividend yield approximately 6.7% at current price. The REIT sponsor injection pipeline from Filinvest Group — and potential longer-term ATC asset optionality via ROCK — remain medium-term value drivers.
