Ayala Land, Inc. (ALI) • Close: ₱15.18 (-1.81%) | STANCE: ACCUMULATE

- **The Catalyst:** Pulled back with the broad tape after Tuesday's +2.25% rally. However, parent Ayala Corp's visible floor buy at ₱15.006 remains the critical reference level. Ayala Land Premier formally began unit handovers for the Gardencourt development in Arca South, Taguig, driving balance-sheet cash collections.

Semirara Mining & Power Corp. (SCC) · Close: ₱16.70 (-5.01%) | STANCE: CAUTION

- **The Catalyst:** Emerged as the primary index laggard, sinking -5.01% as the Department of Energy confirmed plans to proceed with a competitive coal auction, following SMPC's resistance to certain data-sharing requirements.
- **Action Plan:** Avoid dip-buying immediately; allow the regulatory and auction mechanics to clarify before reassessing yield sustainability.

DigiPlus Interactive Corp. (PLUS) · Close: ₱8.73 (+1.51%) | STANCE: SELECTIVE MOMENTUM

PLDT Inc. (TEL) · Close: ₱1,125.00 (-0.88%) | STANCE: ACCUMULATE ON WEAKNESS

Module VI: The Intelligent Investor: Generational Wealth & Market Wisdom

Curated Market Architecture drawing from [Investopedia](https://www.investopedia.com), Warren Buffett, Charlie Munger, and Ray Dalio.

The Anatomy of a Support Breach

The PSEi's drop to 5,916.94 and the US Federal Reserve's rate hike on September 16 illustrate a classic late-cycle liquidity contraction. When psychological baselines break, algorithmic stops and margin liquidations trigger indiscriminate selling.

The Three Core Disciplines

1. **Charlie Munger on Emotional Control & Cash:** "It takes character to sit there with all that cash and do nothing. I didn't get to be where I am by going after mediocre opportunities." When a market breaches major support, the intelligent investor preserves liquidity and demands an expanded margin of safety.
2. **Warren Buffett on True Moats:** "The single most important decision in evaluating a business is pricing power. If you've got the power to raise

prices without losing business to a competitor, you've got a very good business." Generational wealth is constructed by acquiring cash-flow fortresses (ALI, BPI, MER) when external macro shocks depress their multiples.

3. **Ray Dalio on Stagflationary Deleveraging:** Central bank tightening coupled with supply-driven inflation demands allocation into balance sheets with tangible asset backing and minimal refinancing exposure.

Multi-Horizon Implementation

- **Short-Term Tactical (1 - 30 Days):** Strict capital preservation. Do not chase rallies while the index is below 6,000. Look for exhaustion volume and trade mean-reversion strictly on deep oversold blue chips.
- **Medium-Term Position (1 - 12 Months):** Strategic accumulation of corporate catalysts. Build positions in names with self-help liquidity catalysts like TEL (REIT proceeds) and MREIT (asset injections).
- **Generational Wealth Compounders (5 - 20+ Years):** Systematic Dollar-Cost Averaging (DCA) into wide-moat compounders. Exploit foreign fund liquidations to accumulate BPI, ICT, and AEV at 3-month valuation lows.

- **DivY 20 Defense:** The widening spread between 10-year sovereign bonds (7.54%) and equity dividends places priority on cash distributions that are fully backed by free cash flows (AREIT, MREIT, MER, RCR).
