High-Conviction Corporate Stance

Ayala Land, Inc. (ALI) · Close: ₱15.46 (+2.25%) | STANCE: ACCUMULATE

- **The Catalyst:** ALI led index gainers, climbing +2.25% on net foreign buying of +₱48.50M. Upward price action reflects institutional confidence following parent Ayala Corp's open-market purchase of 261,500 shares at ₱15.006, establishing an explicit sponsor-backed valuation floor.
- **Action Plan:** Continue accumulating on weakness. Use pullbacks toward the ₱15.00 level as a low-risk entry zone.

Dominion Holdings, Inc. (DHI) & Atlas Consolidated (AT) | STANCE: MONITOR / STRATEGIC ACCUMULATE

- **The Catalyst:** Shareholders formally ratified the book-to-book merger with Indophil and Sonar alongside expanding authorized capital from ₱3.42B to ₱30.0B. This gives the Sy family 54.48% majority control over the combined Atlas-Tampakan mining vehicle (~390,000 tpa copper).
- **Action Plan:** With COMEX copper softening (~632¢/lb), size positions patiently on price dips ahead of SEC merger registration. Long-term reference price target: ₱50.00.

MREIT, Inc. (MREIT) · Close: ₱13.80 | STANCE: ACCUMULATE FOR YIELD

- **The Catalyst:** The SEC officially approved MREIT's ₱27.0-billion property-for-share acquisition from sponsor Megaworld Corporation, injecting prime, high-occupancy Grade-A BGC and McKinley office assets into the portfolio.
- **Action Plan:** Accumulate for dividend yield expansion; long-term lease escalations provide stable cash distributions against a 7.5% sovereign yield backdrop.

International Container Terminal Services (ICT) · Close: ₱958.00 (-3.23%) | STANCE: SELECTIVE PAUSE / WATCH ₱940

- **The Catalyst:** After anchoring recent market inflows, ICT fell -3.23% on heavy net foreign selling (-₱215.40M) as global trade and shipping equities digested escalating Red Sea maritime disruptions.
- **Action Plan:** Pause new buying. Monitor key support around ₱935–₱940 for volume stabilization before adding swing exposure.

Manila Electric Company (MER) · Close: ₱485.40 | STANCE: ACCUMULATE (< ₱470)

- **The Catalyst:** BIR removal of the 12% VAT on allowable system-loss charges took effect immediately, mitigating tariff inflation for end-consumers and protecting volume growth as MGen advances its renewable/LNG pivot.
- **Action Plan:** Maintain stance: Accumulate on pullbacks; primary limit-buy orders remain strictly < ₱470.00.

Module V: SmartWatch Corporate & Regulatory Disclosures

- **Commercial REITs — MREIT Expansion:** SEC formal approval of the ₱27B asset injection cements MREIT as an institutional office vehicle with high-occupancy assets across prime corporate hubs.
- **Mining Transformation — DHI / Tampakan:** With shareholder voting concluded, Dominion Holdings will proceed with share issuances to complete the consolidation of Tampakan into the listed vehicle.
- **Sovereign Debt Market — BTr Auction:** The Bureau of the Treasury partially awarded benchmark bonds as rising oil fueled higher yield bids, reflecting domestic investor caution on term premiums.

- **Macro Liquidity — OFW Remittances:** Bangko Sentral ng Pilipinas reported July cash remittances reached a 7-month high, providing dollar support for domestic consumption.
- **Capital Market Offerings:** The SEC Chairperson affirmed the market's capacity to absorb large upcoming transactions, including Mynt (GCash) and PLDT's VITRO REIT.

Module VI: The Intelligent Investor: Generational Wealth & Market Wisdom

Surviving the 6,000 Support Line: Capital Allocation in a Stagflationary Trap

With WTI crude oil crossing \$105/bbl, domestic 10-year bonds yielding 7.53%, and the Peso at ₱62.835, the PSEi's drop to 6,007.78 tests investor psychology.

The Three Pillars of Wealth Preservation:

1. **Charlie Munger on Inversion:**

'Invert, always invert: What will destroy an equity portfolio right now? Unhedged dollar debt, rising fuel inputs without pass-through capability, and declining return on equity. Avoid leveraged balance sheets and focus capital on essential businesses with protected margins.'

2. **Warren Buffett on Inflation Math:**

'A business that requires heavy ongoing capex just to stay operational will suffer when replacement costs surge under currency devaluation. Durable wealth compounds in businesses with low capital intensity and proven pricing power.'

3. **Ray Dalio on Debt Cycles:**

In late-cycle tightening regimes where inflation collides with rising yields, real productive assets (landbanks, utility generation, contracted infrastructure) preserve purchasing power far more reliably than financialized growth names.

Multi-Horizon Implementation:

- **1. Short-Term Tactical (1 - 30 Days):**
 - **Posture:** Capital preservation & strict technical discipline.
 - **Strategy:** Defend the 6,000 technical line. Trade mean-reversion on deeply oversold blue chips (SM and JGS at RSI < 30). Avoid chasing extended small-caps (ACR, ION at RSI > 70).
- **2. Medium-Term Position (1 - 12 Months):**
 - **Posture:** Catalyst execution & balance sheet deleveraging.
 - **Strategy:** Accumulate assets undergoing clear balance sheet or portfolio transformations: ALI (₱15.46, sponsor backed), MREIT (₱13.80, ₱27B injection), and TEL (₱1,135, VITRO REIT deleveraging).
- **3. Generational Wealth Compounders (5 - 20+ Years):**
 - **Posture:** Systematic Dollar-Cost Averaging (DCA) into wide-moat compounders.
 - **Strategy:** Acquire businesses with natural FX hedges and monopoly advantages on market dips: ICT (₱958.00, global USD revenue stream), BPI (₱102.00, CASA deposit franchise), and AEV (₱37.70, diversified infrastructure and power network).
